

PECB CERTIFIED ISO 28000 Transition

Become acquainted with the differences between ISO 28000:2007 and ISO 28000:2022

Why should you attend?

The ISO 28000 Transition training course enables participants to thoroughly understand the differences between ISO 28000:2007 and ISO 28000:2022. In addition, it allows participants to acquire knowledge on the new concepts, requirements, and recommendations presented by ISO 28000:2022.

Published in March 2022, the latest edition of ISO 28000 follows the harmonized structure of ISO, where the requirements for the security management system (SeMS) are outlined in clauses 4 to 10. This structure facilitates the integration of the SeMS with other management systems based on ISO standards. The title of the standard has also changed from *Specification for security management systems for the supply chain* to *Security and resilience – Security management systems – Requirements*, to emphasize the fact that ISO 28000 requirements are not only applicable to organizations in the supply chain, but to all organizations, regardless of the type, size, or industry.

The “PECB ISO 28000 Transition” training course provides detailed information on the revised and new requirements and terminology. Furthermore, it equips participants with the necessary competencies to support organizations in transitioning their SeMS to ensure compliance with ISO 28000:2022.

After attending the training course, you can take the exam, and if you successfully pass the exam, you can apply for the “PECB Certified ISO 28000 Transition” credential. The internationally recognized “PECB ISO 28000 Transition” certificate demonstrates that you have the knowledge and professional capabilities to successfully update an SeMS to ensure compliance with the requirements of ISO 28000:2022.
