Applicant must keep this permit form and have it available at time of final inspection. If the applicant loses this permit, a new application will need to be completed, and all applicable fees paid. If additional inspections are necessary, there will be an additional fee for each inspection.

ACCESS ROAD GUIDELINES

Privately maintained Roadway Width, Surface and Turnaround Requirements:

- All access roads serving 1 or 2 dwellings shall have a minimum improved driving surface width of 12 feet.
- All access roads serving 3 or more dwellings shall have a minimum improved driving surface width of 20 feet.
- If the access road exceeds 150 feet in length, then a turnaround is required to be placed within 150 feet of the dwellings. (see attached)
- A vertical clearance of 13 feet 6 inches is required over the width of the access road.
- Approved driving surface materials: crushed gravel, recycled asphalt, concrete and asphalt. Surface material minimum thickness of 2 inches placed over 6 inches minimum base of pit run or equivalent.

WATER SUPPLY FOR FIRE SUPPRESSION

Municipal Water System – A fire hydrant, supplied by a municipal water system capable of supplying 1500 GPM, located with 1,200 feet driving distance of the residence.

Private and/or Community Well – A fire hydrant, supplied by a private and/or community water system, located within 1,200 feet driving distance of the residence. The hydrant shall be capable of supplying 1500 GPM. For a private and/or community well to be considered as a water supply the owner/applicant will be required to provide fire flow information from the water purveyor that verifies the well is capable of the required fire flow.

Elevated and Pressure Tanks – A fire hydrant, supplied by a tank with a water capacity of 180,000 gallons, located within 1,200 feet driving distance of the residence.

NFPA 13D Fire Sprinkler System – In lieu of the water systems above an NFPA 13D fire sprinkler system may be installed in the residence. Plans for the design of the fire sprinkler system are required to be submitted to the fire jurisdiction for review and approval. Installation inspections of the system will be carried out by the fire jurisdiction.

Section 39-4116 Idaho State Legislature - All single-family homes and multiple family dwellings up to two (2) units are hereby exempted from the provisions of the International Fire Code, the International Business code and the Idaho residential code that require such dwellings to have automatic sprinkler systems installed. Nothing in this section shall prevent any person from voluntarily installing an automatic fire sprinkler system in any residential dwelling.
