

2024 January Central AZ Raceway Spectator Camping Insert Area 3

Camping Spots are 16' wide, on packed dirt.

110v Power is located on the junction boxes labeled "P". Each box serves 4 spaces. You cannot use this electricity for air conditioners, electric heaters, etc. Overworking the electricity will cause breakers to trip and/or connections to burn. They may or may not be replaced during your stay.

Generators are welcome, make sure you observe quiet hours.

Water is available on the line through Y connections. Bring your own hoses and extra Y's to make sure you have a supply.

Showers and restrooms are available 24/7.

The dump station is included in your fee. If you choose not to move your rig to dump you can call an extraction company at your own expense.

Absolutely no race cars or car trailers are allowed on the property, they must stay in the pits at the racetrack.

All other PFEC camping rules apply. No parking tow vehicles or any vehicles on grass or landscaping adjacent to buildings.
