

OUR MISSION STATEMENT

to provide the very best Health Care for the general public at an affordable price. PICC also provides these Discounted Healthcare Services with no hidden costs and a "one visit, one bill" type of billing system, so the patient always knows exactly what the total amount is. Proactive Occupational Medicine, Inc, the parent company of PICC, has, over the years, been able to negotiate outstanding rates for Laboratory Services, Radiological Services, Pharmacy Prescription Services, and Medical Supply Services and now is able to pass those savings on to the general public in a medical clinic type of format. The owner feels this in one way to "give back" to the community that he has been a part of all his life. Proactive Immediate Care Clinic intends to maintain its high standard of medical services to its patients at a discounted rate, always second to none in Medical Services and number one in price.

PROACTIVE IMMEDIATE CARE

WHO WE ARE

Safety professional Jeff Brown started his occupational medicine company in 1999 to serve the business community by treating their most valuable asset-employees-while providing a cost-effective health services solution for employers. In 2017, Mr. Brown opened the clinic to the public to provide quality healthcare at an affordable cost.

Patients under 5 years of age need to be seen in a different setting that offers Pediatric Care.

Immediate care does not provide routine immunizations or narcotic medications.
