Our Holding Group

HOF Scientific (UK) & Bensberg Sciences (USA) – A Global Holding Group
The main Base of the Head Office in United Kingdom's

HOF Scientific, in partnership with Bensberg Sciences, proudly leads a dynamic international consortium of companies headquartered across the United Kingdom, the United States, the United Arab Emirates, Germany.

Specializing in medical devices, food supply, and energy solutions (Oil and Gas), our group brings together deep industry knowledge, regulatory expertise, and a commitment to innovation across critical sectors.

With over 15 years of experience, we serve as a strategic bridge between global manufacturers and high-demand markets—particularly across the Middle East ensuring seamless supply chains, market access, and regulatory compliance.

As a group, we are united by a vision of long-term partnerships, quality excellence, and market leadership, The group also leads specialized consultancy services in project management, engineering design, construction oversight, and geotechnical and surveying solutions. From planning to execution, we help clients deliver high-quality, well-engineered infrastructure with confidence and efficiency.

What We Do

Our Energy Division delivers complete solutions in power generation, transmission, and sustainable energy infrastructure. We support governments and private clients with reliable, high-capacity systems designed to meet growing regional demand.

In the Oil and Gas sector, our expertise covers the full value chain—exploration support, pipeline engineering, gas processing, refinery services, storage solutions, and asset integrity management. We provide advanced technical solutions such as flow assurance, geotechnical analysis, risk-based inspections, and modernization of existing facilities.

Our Medical Equipment Division specializes in delivering certified, advanced healthcare technologies tailored to the needs of regional health systems. We partner with leading global manufacturers to provide high-quality medical devices, diagnostic solutions, hospital equipment, and life-support systems.

Our services cover product sourcing, regulatory compliance, distribution, installation, and after-sales technical support. With a strong focus on safety, reliability, and international standards, we ensure that all equipment meets strict clinical and regulatory requirements.

By integrating global innovation with local healthcare priorities, we support governments, hospitals, and private providers in strengthening medical infrastructure, improving patient outcomes, and expanding access to modern healthcare solutions.

Our Food Division provides reliable, high-volume supply solutions that support national food security and meet the needs of regional markets. We work with certified global producers to ensure consistent sourcing, safe handling, and timely delivery of essential food products.

Our capabilities include importation, quality control, warehousing, temperature-controlled logistics, and large-scale distribution. With strong compliance and traceability systems, we help governments and private clients maintain stable, high-quality supply chains while reducing operational risks.

Through strategic partnerships and efficient logistics networks, we deliver dependable food solutions that support long-term market resilience and growth.

About Us

Our Values

SERVICE 1

dynamic value networks are formed by connecting assets based on how they contribute to the larger goal, rather than their alignment within a specific sector.

This sector-agnostic approach allows us to explore and develop new partnerships and solutions that quickly generate value and prioritize investors and stakeholders in every project.

SERVICE 2

We take our responsibility to shareholders, clients, and employees seriously. Our commitment to responsible investment ensures that we create sustainable value and by staying connected to the communities we serve, we can make a positive difference with every investment.
