## **Trexo Robotic Home Sponsorship Information and Application**

Description
-------------

The Kourageous Karter Foundation aims to make life better for medically complex kids and the people who love them. We accomplish this in several ways, one of which is taking on mission projects that directly benefit individuals, families, and/or community initiatives related to children with severe neurological conditions and medical complexities.

In our opinion, walking is an experience every child deserves, regardless of disability. We believe in the health and social benefits brought about by the medical technology, Trexo Robotics Gait Training system. We aim to provide a selected family with one 12-month lease of the Trexo Home system.

Criteria
----------

- 1. Must complete assessment by Trexo Robotics to determine eligibility (they will determine if the child is an appropriate candidate).**

### **How do I know if my child is an appropriate candidate?**

Once selected, you will receive an email with the assessment form. Here, you will fill out further information about your child, upload videos, and measurements. To complete the assessment you will need a measuring tape and access to a device with video recording capabilities.

Trexo will walk you through the set-up & training to ensure the device is set-up for your child's needs on a live video call.

The initial set-up and training takes time. It is much easier if there are two people that can help with training and set-up. If possible, please ensure set-up is scheduled for a time when two adults can be present, and 3 hours available.

FOUNDATION**

### **Rifton Pacer**

The Rifton Dynamic Pacer is not included with the purchase of a Trexo Home, but is required to use this technology. They use a standard off the shelf Dynamic pacer and install the system on it. You would need to obtain your pacer prior to the delivery of your Trexo Home to ensure we can provide the fitting and training with a fully assembled system. If you need a Rifton Dynamic Pacer and cannot obtain one separately, we can assist you with the purchase in addition to the Trexo. Please make sure you have received the recommended size and accessories from Trexo before you place a Rifton order. You will receive this once you complete the assessment and receive approval for the use of the Trexo.

### **Trial Period**

Once you receive your Trexo Home, complete with set-up and training, the recipient will begin a 14-day trial period through Trexo. During this time you'll want to be sure the child tolerates and benefits from this technology, and that you (the family) wants to follow through with the commitment to use it (see general usage guidelines).

### **Internet and Video Access**

In order to set up the Trexo Home, it will require a device that enables you to videochat via Zoom with the Trexo team virtually. Having access to their chat app, and Zoom consultations is a requirement for eligibility.

## **2. Must demonstrate a financial need (see application for details)**

# KOURAGEOUS KARTER FOUNDATION

## Terms

1. This sponsorship will cover one 12-month lease for the appropriate size Trexo.
2. The recipient must demonstrate consistent usage of the Trexo, as deemed appropriate by the Trexo team (case by case basis). The Kourageous Karter Foundation reserves the right to terminate the contract if the recipient fails to use the Trexo on a consistent basis.

### General Usage Guidelines

The recipient hereby represents and warrants to the foundation that:

- the recipient will follow the instructions provided by the Trexo Company as provided in the User Manual and
  - the recipient agrees to use the Trexo and the Services as intended and follow good practices outlined during the training provided by the Trexo Company;
  - the recipient agrees to only allow individuals to operate the Trexo after sufficient training has been provided
  - the recipient will make their best effort to use the device at minimum 8 sessions per month
3. The recipient must agree to sign a media release, as well as permission for Trexo to share data usage and progress with Kourageous Karter Foundation. In doing so, the recipient allows KKF to use photos, videos, and other media of the Trexo device and recipient and use them on our website, social media platforms, and/or marketing materials.

KARTER  
FOUNDATION**

### **Discontinuation**

1. After the 14-day trial, if the Trexo team and/or family determines it's not a good fit for any reason, the Trexo will be returned to the company. A representative from Trexo will contact you on how to issue that return.
2. If a Rifton gait trainer was purchased as part of the Trexo sponsorship with KKF funds, the Rifton gait trainer will be returned to KKF.
3. If the recipient fails to use the Trexo on a consistent basis (as determined what is appropriate by the Trexo team), KKF reserves the right to discontinue lease payments. The recipient would be responsible for returning the Trexo, as directed by the Trexo team. Likewise, the Rifton would be returned to KKF (if purchased by KKF).
4. After the 12-month lease is up, KKF will no longer issue monthly payments. The recipient can choose to continue payments on their own, work with Trexo to submit to insurance, and/or re-apply for a sponsorship with KKF. If the Rifton was purchased by KKF, the family has the option to purchase from KKF or return to KKF.

<b>Application</b>
--------------------

Please complete this google form to submit your formal application.
