**Job Title: Sr. SAP Finance Configuration Technical Analyst**

The Sr. SAP Finance Configuration Technical Analyst serves as a global subject matter expert associated with content, processes, and procedures to implement and support SAP. This is a global role to provide support to all company locations to simplify and optimize systems, process, and procedures. The selected candidate will act as a key liaison between the SAP Finance team, other SAP teams (Q2C, P2P, P2M), technology and the finance business teams to ensure quality outputs are delivered in a timely fashion and with no disruptions in other areas.

**Role/Responsibilities**

- Position objectives include supporting end-users with minimal supervision on financial applications (SAP S4 Procure to Pay, Record to Report). This position will be involved in addressing small to complex day to day user issues/requests and require hands on research that includes but not limited to information/data gathering to formulate a comprehensive solution. This position will also participate as a member of the team on project-related tasks while supporting urgent user issues / requests.
- Support SAP Finance function and applications, including trouble-shooting, configuration, maintenance and enhancements. Responsible for process design, configuration, creation and dissemination of procedures /documentation, testing, and training where applicable. Support reporting/query needs including the creation of specifications, development and maintenance, and testing of reports and queries. This position will provide guidance as necessary to lower-level staff working on user issue and or project-related requests.
- Effectively communicate and translate technical concepts to the user community. Participate in projects as required.
- Perform hands-on configuration in the SAP FICO modules. Facilitate the implementation and support of SAP Financials (focus on SAP GL, AR, AP, AA, CA, IP)
- Perform detailed analysis of complex business process requirements and provide appropriate system Solutions; identify, interpret, validate, and document business requirements. Document functional designs, test cases and results.
- Facilitate workshops to collect business requirements. Map business requirements, processes and objectives; develops necessary product modifications to satisfy business- needs.
- Act as liaison with business for troubleshooting: investigate, analyses, and solve software problems.
- Look for alternative approaches to SAP custom development in collaboration with SAP and SI. Determine what functionality is required in terms of design, structure and configuration, in line with internal guidelines and procedures, in order to translate the IT requirements into an optimum IT solution. Keep solution as close to standard SAP as possible.
- Train SAP superusers, business process owners and business process leads.
- Scope and estimate business requirements. Work with business process leads and users to gather requirements for reports and application extensions
- Resolve Service Request tickets in accordance with agreed-upon SLAs. Solid understanding and use of Solution manager ChaRM. Familiarity with ServiceNow is a plus

- Support the deployment of production applications and provide post-production support related to custom system enhancements and integration points.
- Participate in system and apply upgrades, enhancements, and resolutions.

**Education Requirements:**

- Bachelor's Degree desired

**Technical Requirements:**

- 15+ years' experience in IT supporting business systems required
- 10+ years of hands-on SAP ECC configuration experience of FI and CO (GL, AP, AR, AA, CA, IP)
- Experience implementing and supporting SAP S/4 HANA 1709 or greater

**Experience Requirements:**

- Demonstrated SAP Functional knowledge
- Proven track record in designing, building, and developing SAP FICO configuration
- Solid understanding of the financial close process (both month-end and year-end)
- A technical understanding of SAP ABAP
- Experience working with OneSource, VAT and GST is a plus
- Excellent written and oral communications skills; ability to lead discussions, present ideas to audiences of all sizes, and interact with all levels of the organization
- Excellent analytical skills
- Ability and flexibility to quickly learn new applications and software
- Ability to work with teams or independently
- Experienced in leading / project managing specific pieces of work, people and/or deliverables
- Solid organization, time management, and project estimating skills
- Ability to work under pressure to meet deadlines, both as an individual contributor and as a team member
- Willingness and ability to travel as required
