- **Many Bulls Suitable for Heifers**
- **Free 600-Mile Bull Delivery**
- **First Breeding Season Guarantee**

Fresh Genetics • Calving Ease • Good Dispositions

Welcome

We would like to welcome you to our production sale whether in person or on DV Auction. 95% of our customers are repeat buyers and we promise to take care of new customers just like we take care of our existing customers that have become our good friends. We look forward each year to delivering your cattle and having a good visit one-on-one. If you have been thinking about trying DK genetics, do not hesitate on pressing the DV Auction button. Just remember you must register the day before in order to bid on sale day. We have had cattle go to ND, SD, MN, NE, MT, WY, and KS.

We are like most ranchers. We expect cattle to calve easy, nurse by themselves on a good-uddered cow, grow fast, maintain a good disposition, weigh up heavy, stay structurally correct, be highly fertile, and be an easy keeper. We like stacking solid female-making genetics on top of each other, so there are no surprises or disappointments. Every bull we sell is expected to produce top-rate females or highly desired steers. Our goal is to improve every year on these traits which in turn will help your pocketbook and ours.

Again the bulls were fed CHS pellets and Feed Mix Bull Ration twice a day with free-choice grass hay. They are not fed for the show but to go to work for you and keep growing. We shoot for a 3-lb. daily gain on test and we know these bulls could gain a lot more but would only hurt them in the long run. We feel this is one of our best set of bulls and heifers top to bottom. Many of these bulls are suitable to use on heifers.

For those of you that can't make it to the sale, you'll be able to watch & bid on DVAuction.com. Videos of the bulls will be available a couple of weeks before the sale at the DVAuction.com website but remember that the video was shot a month before the sale and the younger bulls are still pretty green. If you have any questions don't hesitate to call us. The bulls will sell pretty much in birthdate order as listed in the catalog. Ultrasound carcass data will be available a few days before the sale.

Also bulls will be delivered free to U.S. central locations within 600 miles and we will work with you on further distances. If you buy two or more registered heifers, we will deliver them also within 600 miles.

You are welcome to come look at the bulls at the ranch before the sale. We would be happy to show you the sires & dams. Give us a call – we'd be glad to assist you in finding the right bull to fit your herd.

Thanks so much to our many repeat customers and friends.

Thank you and God Bless,

The Kuefflers

Scott and Connie, Michala and Kirsti Kueffler
Bonnie Kueffler

Scrotal Measurements and Ultrasound Data:

Scrotal measurements and carcass ultrasound data will be available sale day.

Semen Interest:

DK Red Angus is retaining 1/3 semen interest in all bulls. The retained semen interest allows us to collect semen, use semen in our herd, and share in revenue of semen sales. Full possession and full salvage value sells on all bulls.

Delivery:

Delivery is free to U.S. central locations within 600 miles. We will work with you on further distances. \$50 refund per bull picked up within one week of the sale, or \$25 refund per bull picked up after April 25 at the ranch. If you purchase two or more heifers, free 600-mile delivery applies.

Feeding:

We will feed the yearling bulls free of charge until April 25 and have the bulls semen tested at our expense. After April 25, there will be a \$2-per-day charge.

Genetic Defects:

We have collected DNA samples on every bull in the sale with any known genetic defect carrier in the first three generations. The bull tested negative unless otherwise noted.

Osteopetrosis (OS) “Marble-Bone Disease”

OSF – Tested “free” of the genetic defect

OSC – Tested positive as an Osteopetrosis “carrier”

Calving-Ease Recommendations:

Each bull has been designated with a star rating to assist you in determining the calving-ease of each bull. We have based our recommendations on EPDs, performance, phenotype and bloodlines, but please use your judgement as well.

★★★ Recommended for heifers

★★ Recommended for larger heifers and cows

★ Recommended for cows only

Bidding:

All animals sell to the highest bidder. Any dispute or challenges regarding bids will be settled by the auctioneer and his decision will be final.

Volume Discount:

Three or more bulls purchased = 5% discount

Terms:

Terms of the sale are cash or check payable immediately upon conclusion of the sale and before animals will be moved. Seller will reserve the right to require a certified check as settlement before releasing any cattle. All animals are the owner's risk prior to their sale and become the property of the purchaser as soon as declared sold by the auctioneer.

Guarantee:

The bulls are guaranteed to be sound breeders. You may semen test or test breed them prior to breeding season and make your own evaluation. Any bull sold that fails to prove himself a breeder may be returned to the seller after notification by the buyer of the condition within five months of sale date. If a bull is proven unable to breed, the buyer will be given a full refund of purchase price or a replacement bull as acceptable to the buyer or credit in next year's sale.

We will guarantee bulls for the first breeding season which will end as of Sept. 1st in the year of purchase. If a bull is injured permanently and unable to breed cows, we will replace him or give credit in next year's sale, less salvage of the injured bull.

In no case will the seller be responsible for more than actual purchase price. The seller's guarantee does not apply if the animal in question has developed to be a problem breeder due to negligence or improper management by the buyer.

Heifers are guaranteed open and able to breed.

Announcements:

Announcements from the auction block will take precedence over printed matter in this catalog.

Liability:

All persons who attend the sale do so at their own risk and the owner and sale manager assume no liability, legal or otherwise, for accidents which may occur.

Performance Codes

Red Angus Categories:

Category 1A 100% Red Angus • Category 1B 87% to 99% Red Angus

Performance Information:

BW Actual Birth Weight

WW 205-Day Adjusted Weaning Weight

ADG Average-Daily-Gain on Test

YW 365-Day Adjusted Yearling Weight

WDA..... Weight-Per-Day-of-Age over Lifetime

Dam's Age..... Age of the Dam When Calf was Born

Dam's MPPA..... Dam's Most Probable Producing Ability is a ratio that measures her ability to produce milk for her calf and her contribution of genetics to the calf.

Top Pick was our pick from Sandy Willow Red Angus and their 2020 high seller. The first year he was used mainly on our 2-year-olds so weaning weights were down, but really did well on test. He proved more growth than his sire, Franchise but still producing very eye-appealing, well-balanced, and structurally correct calves. We plan on using him a lot in the future. Check out how uniform his calves are with their smooth shoulders, wide tops, and big hind quarters.

Advantage is a bull we raised out of one of our elite cows with a MPPA of 107 and sired by "Rifle" that we co-owned and sired many of our Simmental-influenced calves. Advantage weaned at 831 lbs. and had a 1,446 lb. yearling WT. He is 78.1% Red Angus so most of his calves will be 89% Red Angus and in turn bred to straight Red Angus cows will be almost 95% Red Angus. These calves will give you an "Advantage" in heavier weaning weights and wide-topped, easy-keeping females. Don't pass them by.

U2 Township 17 G was a sale highlight at the U2 Ranch in Canada bringing more than \$100,000. His dam, U2 beauty-113z has been one of the most productive donor cows in the Red Angus breed. Township produces heavy muscled, moderate-framed calves with excellent conformation. They really shined all summer long.

Pie Captain was one of the most sought after Red Angus bulls in the country in 2021 selling for \$150,000 at the Pieper Red Angus Spring Production sale. He produces low birth weights and heavy weaning weights with ideal leg and foot structure. He calved very easy on heifers.

We do a lot of research and traveling looking for just the right bull that is going to produce those outstanding females without losing growth. This time we found him in our backyard! DK Freightliner is extremely long, thick across the top and "wow what a butt" on him. His pedigree on both the top and bottom are stacked with easy keeping, naturally thick, outstanding females. You will like his progeny.

Fritz was our pick at Fritz Red Angus 2019 production sale. He was the #1 gaining bull on test for them. He is super wide topped, deep sided, and very correct on his feet. He produces a very well-balanced moderate frame calf, without giving up muscle. The first year he was used mainly on our 2-year-olds, so weaning weights were down, but they really did well on test. We plan on using him a lot in the future. Check out his females in the sale. They are impressive.

All Red Angus trace back to black Angus. Sometimes the gene pool for Red Angus can be a little small, so we have brought some new genes into our herd by breeding some of our tops cows to some top end Angus genetics through AI. These offspring, when bred to Red Angus will throw 50% red calves which in turn become 100% 1A Red Angus cattle. These same offspring bred to homozygous black cattle will throw 100% black-hided calves. Basin Payweight Plus 6048 will provide tremendous carcass traits along with maintaining excellent growth, good dispositions, and heavy milking females.

Another great DK Advantage G331 bull. Having been lost due to injury, this is the year to buy one of his sons, you will not be disappointed.

RED ANGUS GUIDE TO EPDS

RedAngus.org

ProS..... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

HB HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

GM..... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

CED Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

BW Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

WW Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

YW Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

ADG Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

DMI Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

MILK Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

ME Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

HPG Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

CEM Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

STAY Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

MARB Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

YG Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

CW Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

REA Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

FAT Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

Toppick combined with Rifle, there is nothing wrong with this heifer. If born just a little earlier she would have stayed at home, she will fit right into many replacement pens.
