

This tool is intended to provide producers with information; it will provide recommendations for the H2Ohio Manure Incorporation program. Specifically, this tool provides information related to the management of crop fertility needs through the addition of solid or liquid manure. Use of this tool does not relieve the producer from the obligation to fully understand and abide by all applicable rules, regulations, and standards.

Manure Application Record

Application Date		Manure Amount Applied	
Area Covered		Manure Application Rate	
App Method		Manure Applicator	
Weather Conditions		Soil Moisture at Application	
Setbacks Observed		Date of Incorporation	
Notes
