

Manual Flush Valve-allows you to flush/rinse your system w/fresh water. It determines whether you pull water or SH through the CHEM valve on the Hydro-Mixer. Also allows you to rinse w/full performance and high GPM if using your pump to rinse.  
 \*optional remote rinse module available in lieu of manual

- Flush valve can mount directly to SH tank or remotely
- Water & SH supply lines should be of similar length for accurate and consistent metering
- Water supply for flush valve and water valve should be dedicated, do not tee into other lines
- Always use strainers on pickup lines in tanks
- Use PVC slotted filter in SH tank, NO metal except titanium
