Software Application Development Services

Your business and its challenges are unique. So are our solutions. We offer innovative application development capabilities that meet your requirements. From business management to eCommerce applications, we have the competence necessary to deliver the efficiency required by your company.

We adopt design thinking methodology and build applications using latest technology such as using Containers and Microservices. This makes it easier to maintain, and more importantly much easier to expand and scale. Our team can design microservices consisting of independently deployable services around business capability, automated deployment, intelligence in the endpoints, decentralized control of languages and data.

Our experts will help with planning, design, and development of your applications to improve your business' effectiveness. We deliver unmatched business value through the use of open-source tools and in-built accelerators that transform your workplace into an agile environment for increased efficiency and productivity.

Managed Services

Opasa is one of very few Australian IT firms that boasts of a best-in-class IT facility in India. Our full-time professionals in India have the expertise and experience necessary to help you extend your teams for any project, however simple or complex.

We offer A&NZ based SMBs the capability to on-board resources in India without needing to set up a legal entity in India and via flexible engagement models.

At Opasa's India Centre, our clients can tap into India's IT Innovation and resource talent quickly for short term and long-term needs – with our services ranging across the entire IT Asset lifecycle.

We provide resources that meet client requirements, agile / scalable delivery models and local leadership for ongoing support or oversight.

Our flexible commercial engagement models such as Cost+ (suited for staff augmentation) to full-fledged teams on Fixed Price/Committed Outcome engagements provide clients with options that fit their corporate strategy
