

Underwater Search & Recovery Services

Professional, Methodical Recovery — Above and Below the Surface

Lost something underwater? I offer **underwater search and recovery services** using scuba diving, underwater drones, and specialized tools to locate and recover submerged objects in lakes, quarries, ponds, and coastal waters.

Each recovery is approached methodically, with safety, visibility, and environmental conditions as top priorities.

What I Can Help Recover

- Lost equipment (drones, cameras, tools, dive gear)
- Boating and dock items
- Personal property
- Survey and inspection assistance
- Visual confirmation and documentation (photo/video)

Recovery feasibility depends on depth, visibility, bottom conditions, and access.

How the Process Works

1 Initial Consultation

We start with a conversation to understand:

- Location and access
- Depth and water conditions
- Description and last known position of the item
- Timeline since loss

This allows me to determine the **best search method** (drone, diver, or combination).

2 Search Plan & Estimate

Based on the information provided, I'll outline:

- Proposed search approach
- Estimated time on site
- Equipment required
- Travel considerations

Pricing varies depending on conditions and scope.

3 Deposit & Scheduling

A **non-refundable deposit** is required to:

- Secure the date
- Cover planning, mobilization, and travel
- Initiate the search effort

The remaining balance is handled based on recovery outcome (details below).

4 Search & Recovery Attempt

Search efforts are conducted within an **agreed time window**, using appropriate equipment for the environment. When possible, visual confirmation is provided during or after the search.

Payment Structure (Transparent & Fair)

- **Non-refundable deposit** required to initiate the search
- **Balance payable upon successful recovery**
- In some cases, a portion of the balance may be **held and partially refunded** if the item is not recovered within the agreed search time

Details are confirmed **before** work begins — no surprises.

Important Notes & Limitations

- Recovery is **not guaranteed**
- Environmental conditions can change rapidly
- Some items may be buried, entangled, or inaccessible
- Safety considerations may limit dive operations

Every effort is made to locate and recover items, but results depend on real-world conditions beyond anyone's control.

Service Area

- Local and regional locations
 - Travel available by request
 - Additional travel costs may apply
-

Contact for Availability & Pricing

If you believe recovery is possible, reach out with:

- Location
- Depth (if known)
- Description of the item
- When it was lost
