For Specialists

- Improve implantation success
- Genomic compatibility scoring via
- Donor + IP polygenic testing
- Preliminary Pipeline of Donors
- Microbiome-mediated protocol
- Optimal Oocyte Quality/Embryo Quality
- Computational algorithm that is lab-agnostic
- Fee for fertility center: \$2,500 for biological parents + up to 30 embryos
- Savings in marketing costs by providing de-identified donors

For Potential Parents

- Identify best quality egg donation via nature's selection process, applied by genetic pre-screening offering you the best possible sample to create a healthy baby.
- Major Histocompatibility Complex (MHC/HLA) for each embryo
- Save time, tears, and money by reducing risk of unsuccessful implantation.
- Platform access: \$60 mo/subscription + bid on best donor match scored for healthy pregnancy

For Donors or Freezing for Future

- Find the safest IVF center offering microbiome-mediated retrieval designed to reduce inflammation and boost gamete quality
- Reduce risk of high-hormonal dose side effects such as hyper-stimulation and ovarian torsion
- Insure your future, adding 10 years to your reproductive longevity by freezing your best quality eggs post 3 month microbiome-mediated protocol (like the AG1 of fertility).
- Option to opt-in + list your anonymous, pre-screened eggs on our platform for a family in need. If we find an immune-compatible match, you have the option to choose the highest bidder.
- Price: \$10,000 cost of standard egg retrieval, with the option to freeze for free for 2 years.
 - Additional benefits: Vaginal + gut microbiome analysis
 - Genetic analysis of your oocyte pre + post 3 month study if consent to share secure, de identified data. Precision, hormone optional, side-effect free egg retrieval (pre + post study, so you get to choose your egg based on quality before and after).
