

PRECISION HEALTH ACCESS Now Available to All App Developers and Owners!

If you're not connecting via Precision, you are simply
Google Maps without a destination entered!

No cost to access and many revenue sharing opportunities!

BACKGROUND

Since 2007 Precision has helped to architect and build value-based measurement and management platforms with CMS/Payers. These algorithms are not in any EHR or dataset, and the only master structure for all payers resides within Precision's platforms.

- We have current and updated CMS/Payer compliance and quality measures data on 1,061,000 providers and can tell them to the dollar what revenue they are being penalized for not taking.
- The penalties that you never see - On one sample code a compliant provider receives \$352, and a noncompliant provider gets \$179. There are 42 different reimbursement levels in this one region for any one code! Only Precision can optimize this for you while you change nothing!
- They keep 100% of this missed compliance-based revenue as we are compensated separately for our AI triage, care coordination and navigation codes.
- You cannot possibly achieve compliance unless you bill for our electronic triage, care coordination and navigation codes, even if they don't get paid.

RESULTS?

The very same system that was built to penalize organizations and providers can correct their path in the background with their own rules without any operational changes required. There is no new technology to learn, no upfront or out-of-pocket costs, and a profit is guaranteed.

[More information here.](#)

"Your best life, health, and travel assurance for you and your family is to have your health records in one place on your device instead of spread across many password protected portals.

The Precision Health Access phone app download and personal records storage is and will always be free, OR for less than the cost of TV streaming services you can have real time updates AND unlimited virtual care.

Example - If you had 10 services in 10 states it would update your records automatically."

What You Should Know About Suggested App Access Links

- ① **Secure Health Records Folder for PDFs** - The only health records the Consumer/Patient functionally needs on their device are [Medical History](#), newly completed Health Risk Assessment, and their latest lab results. Anything extra from the patient, the provider likely won't read. **NOTE** - Google Cloud Healthcare has made available an option for a special health records security folder to Precision's developer and organization partners with a similar function to Google Wallet.
- ② **Link to complete Consumer/Patient Health Records access** - In a 50/50 JV with healthcare intelligence giant, [Milliman](#), for the first time in history we offer a subscription model that updates all patients records in real time in one place no matter where the care was delivered.
- ③ **Shop Our Store** - These are our subscriptions and services and our lead focus.
- ④ **Link to PROACT Shareable Message** - Every breathing American will hear about this historic health records access from numerous sources before the end of 2025. This is because of the efforts of our 501(3)(c) Nonprofit, PROACT - Patient Records Ownership Actions Conservation Trust. **PROACT is the only nonprofit of it's type that not only does not seek donations but donates proceeds back to other nonprofits and charities when their members enroll in our paid services.**
- ⑤ **Link to Precision Life Benefits** - **The Patient Will See You Now!** This is our discount group purchasing organization for access, options, pricing and connecting to any service. Payment options include subscriptions, cash pay, insurance paid or any combination over any range of products and services. This is YOUR Marketplace where we post affiliate links so that we are paid commissions by the vendor with each sale without us having to collect their money. **Build it and make it yours!**
