

UNDERSTANDING THE IMPORTANCE OF OUR PATIENT RECORDS INITIATIVE

The Mission – Stop redundant paperwork and endless requests for health records transfer by storing and transferring your own health records securely on your phone for free.

THE BEST LIFE & HEALTH ASSURANCE IS FREE!

TOGETHER WE CAN CHANGE
HEALTHCARE TO LIFECARE!

PROBLEM

Your health records are spread across the password protected patient portals of every healthcare provider you or your family has even seen.

Healthcare is not to blame, is not its fault, but rather the result of patient privacy laws.

SOLUTION

TODAY we have the technology to put these records on your phone for easy access by you for FREE! OR pay for a nominal monthly subscription and have your records automatically updated in real-time!

MY HEALTH RECORDS PCP HOW IT WORKS

1. Your records are spread across every password protected portal of every provider, facility or service you have ever used.
2. Our AI data partner goes into every Electronic Medical Records system (EMR) of any and all of your providers, insurance company databases, Health Information Exchanges (HIEs), etc. to bring that data home to YOU in one place.
3. That AI process removes duplicate information, ranks the priority of your medical diagnoses, and then summarizes the data for easy access.
4. YOUR data is only accessible to you and updates in real time on your MHR-PCP patient portal.
5. If you were treated in 10 facilities in 10 states those individual records will find their way home to your portal.
6. You can now print or transfer this data into any EMR system.
7. None of your current provider relationships change, we only add our MHR-PCP to the top of your “Air Traffic Control Tower” to give you one point access to everything in one place.

MY HEALTH RECORDS PCP - OUR LONG JOURNEY TO EMPOWER YOU!

1. Since 2007, Precision Healthcare Technologies have architected, built and managed value-based compliance and performance grading and ranking platforms of physicians and hospitals.
2. Our collaborative partners have been CMS (Medicare) and many insurance companies.
3. Therefore, we have current compliance data and scores on 1,061,000 providers so that we can help them to improve your quality of care.
4. We use this technology to ensure that you receive all medically necessary services you require and deserve.
5. Because our platform identifies, validates and documents this medical necessity we are certain the claims will be paid.
6. We are active in 17 sectors of healthcare and consumer health so we are your perfect advocate.
7. We unite these sectors, speak the same language, and connect all services based on each individual patient's ongoing medical needs.
8. Each successive encounter tells us what you need next and then connects you to those services electronically and remotely without the need for unnecessary office visits.
