

# How We Got Here!

Getting to Know Your Partners  
in Our Mission to Change  
Healthcare to Lifecare!

**Five Minute Read** - Before we start, it has taken us 18 years of technological development, eight years of program modeling and two years alone in direct efforts to get you access to your own health records. We have only accomplished what you are about to read by working together rather than in opposition to the other stakeholders in healthcare and consumer health. ALL efforts were and are for the sole mission of simplifying healthcare access and care delivery for the provider, their staff, patients, and consumers.

### **PROACT LIVE - PATIENT RECORDS OWNERSHIP ACTIONS CONSERVATION TRUST**

Is the Nonprofit 5013c that went to bat to get you access to your own health records when nobody else would or could. It does not have revenue, nor accept donations, but does make contributions back to other participating Nonprofits, Charities, and Membership Organizations who share our Public Service Announcements with their members. Here's a short video about how Precision Co-Founder, Doug Sparks found himself unconscious in a hospital without health records access.

### **PRECISION HEALTH ACCESS (PHA) = CHOICE, ACCESS, OPTIONS, & TRANSPARENT UPFRONT PRICING!**

Starting at just \$17.95 if paid monthly, or \$14.95 if paid for the year in advance you get unlimited virtual care and full access to your complete health records in real time. This last item has never been available before now though many big companies have tried and failed! You need this baseline virtual care option even if you have insurance as you are about to read. Or you can replace your insurance with a higher level of more affordable care selected.

### **PRECISION LIFE BENEFITS (PLB)**

Because PROACT and PHA are always free, we offset that cost when you choose a product or service from our Group Discount Purchasing Organization, where we all share in some free services and reduced pricing. Think of it as shopping at the Goodwill Store only for health access!

### **MY HEALTH RECORDS PCP (MHR-PCP)**

Is where you subscribe to access to your health records. Though none of your other provider relationships change, MHR-PCP becomes the top of your provider pyramid as the official requester of your records. Anything that happens with any of your other providers automatically feeds back to your portal here.

This is the just beginning of the new world with;

- No more intake forms
- No more records transfer requests
- No waiting for care or prescription refill appointments
- No more unnecessary or redundant visits
- Connect with your provider or specialist, let us help to find you a new provider, subscribe to an affordable virtual primary care, or even connect to a provider who will take your insurance.

Our Precision Stealth Workflow Intelligence AI-Triage & Care Coordination lets you save time and money by completing assessments in advance on your phone. Since 2007 our one-of-a-kind technology has been in the background and connecting 17 sectors of healthcare and consumer health WHILE providing compliance grading for over 1,061,000 physicians and hospitals. We're your perfect advocate!

## **THE PROBLEMS**

### **DON'T WORRY - WE ALSO HAVE THE SOLUTIONS!**

- 1** A recent post showed that 34% of people and families either don't have health insurance or can't afford to use it.
- 2** Even more that DO have insurance try to "pay cash" unless the procedure is expensive because of the ridiculously high costs of insurance deductible and copayments.
- 3** Even then they can't get in to see their provider nor get their prescriptions refilled without visiting.
- 4** In all cases you still need to have your current and updated medical history and health records, or have it requested on your behalf for any action. We're here for you!
- 5** For "YOUR" security your health records are scattered across every password protected provider or facility patient portal that you or your family has ever visited. Until TODAY!

## **THE SOLUTIONS**

### **BEGIN WITH ACCESS TO YOUR OWN HEALTH RECORDS!**

- 1** Our FREE Precision Health Access phone app, originally built with and for T-Mobile as a subscription-based health access app, is your tool to control and manage your records while gaining access to many other products and services. No purchase is ever required!
- 2** This allows you to log in to those portals and then store your records on your phone securely within our app.
- 3** OR you can subscribe to a service that automatically updates your records in real time wherever you go or wherever you have been.
- 4** If you had 10 services in 10 states those records would come home to YOUR login.
- 5** In partnership with the world's largest healthcare data aggregator all your data comes back home to your "My Health Records PCP" account, now the top of the provider pyramid and always has complete information.
- 6** By adding a very discounted virtual care component to your health records subscription, you no longer must try to get in to see your provider or wait for their response for your prescriptions to be refilled. With your health records, we can greatly expedite this process for you.
