Implementation Governance   Program Execution | Mission Support | Contract Enablement

Implementation Governance for Complex Government Programs

SLBNow, LLC delivers execution governance and strategic oversight for complex government initiatives—bridging technology, regulated operations, and facilities to drive on-time, on-budget, compliant outcomes.

Core Competencies

- Implementation Governance & Delivery Control: governance cadence, integrated schedules, RAID (risk/issues/actions/decisions), change control, and performance reporting to keep delivery compliant and predictable.
- Prime & Subcontract Execution Support: subcontractor oversight, quality checks, deliverable acceptance, documentation control, and closeout support to reduce rework and performance risk.
- IT Service Delivery Governance: ITSM-aligned incident/problem/change governance, stakeholder communications, and Microsoft enterprise environment oversight (Windows Server, SQL, Active Directory).
- Regulated Operations & Compliance Support: executive healthcare operations experience, infection prevention leadership (CIP), and regulatory compliance support (Joint Commission, CDC) with staff development and audit readiness.
- Facilities & Implementation Coordination: multi-party scheduling, site readiness coordination, material verification/acceptance, delivery coordination, and conflict resolution—governance/oversight (not trade self-performance).

Differentiators

- Multi-domain governance: delivery leadership spanning technology, regulated operations, and facilities coordination—useful where compliance and execution intersect.
- Veteran-led, mission-focused: disciplined cadence, clear accountability, and predictable delivery aligned to customer outcomes.
- Strategic + operational depth: experience overseeing up to a $72M annual budget and preventing rework through proactive coordination and controls.

Past Performance

- IT transformation & service improvement: increased incident SLA compliance from 92% to 96.9% for a 16,000-employee enterprise through governance cadence and execution discipline.
- Healthcare leadership & accreditation: achieved and maintained AACN Magnet Accreditation for multiple years through leadership in a major regional medical center.
- Complex IT remediation management: managed large-scale remediation and IT integration workstreams in highly regulated financial services environments.

Company Data

CAGE: 9TQE9
UEI: REGJEVNLMM17
Socio-Economic: SBA-Certified SDVOSB
Florida Certs: VBE, CBE

Federal NAICS

Primary: 541611
Supporting: 541512, 541618
Optional lane: 236220 (construction prime oversight)
