ST. SIMON'S LEARNING INSTITUTE
KIDS GRATITUDE JOURNAL WITH INSPIRATIONAL QUOTES
AGES: 4 - 12

DESCRIPTION

A fun journal for the practice of gratitude expression for the healthy mind development in school -aged children.

Children get to express themselves positively by giving thanks for their daily blessings through written word or drawings. The thankful mindset creates in children a positive attitude for acceptance and endurance during these challenging times.

Today's current events have made our children (students) anxious, fearful and uncertain. Studies have shown that creating awareness of mindfulness in children helps develop healthy mental functions in children, allowing them to be less anxious about the natural occasions of uncertainty in their lives.

Children's very own expression of gratitude for the things and people they have around them creates positivity and happy feelings thus allowing them to have a more positive outlook about the current challenges.

This journal seeks to do just that by creating feelings of joy and happiness within each user. Five minutes each day is enough to give every child who uses this journal enough pleasant thoughts to feel more peace and less anxiety during the day and beyond.

Daily use of the journal is encouraged for maximum results.

Price: \$20.00 Barbados Dollars/ \$10.00 USD

ST. SIMON'S LEARNING INSTITUTE
