

1% buy tax 5% sell :

Tax will be used for development. BambiX Token operates on a transaction-based tokenomics model, designed to incentivize and reward token holders.

A portion of transactions will be used to burn the tokens, effectively reducing the token supply and promoting scarcity. This burn mechanism helps establish a solid foundation for value appreciation in the long term. Additionally, the remaining portion of each transaction is allocated to development initiatives and liquidity, supporting ongoing project development, marketing efforts, partnerships, and activities aimed at strengthening the BambiX Meme Token ecosystem.
