Hope of Glory Men's Ministry, Iron Sharpens Iron will meeting on Saturday November 20th at 11 am. Please join us for an amazing time of fellowship, teaching and prayer.

The Importance of Prevention and Management

Type 2 diabetes can often be delayed, prevented, or even put into remission. Effective management relies on a combination of medical care and lifestyle adjustments:

Early Detection: A simple A1C blood test measures your average blood sugar over the past 3 months to diagnose prediabetes or diabetes early.
Lifestyle Shifts: Managing portions, reducing refined carbohydrates, and staying physically active significantly improve how your body uses insulin.

Medications: Treatment ranges from oral medications (like metformin) to injectable therapies and insulin, depending on your body's specific needs.

Personal Prayer Requests
