

SMOOTHER. BRIGHTER. RENEWED.

DUOVIVE FRACTIONAL LASER RESURFACING

1550 + 1927 nm dual-wavelength technology

A customized, non-ablative treatment designed to refresh tone, texture and overall radiance.

TWO WAVELENGTHS. ONE PERSONALIZED TREATMENT.

1550 nm

DEEPER RENEWAL

- Supports collagen remodeling
- Targets texture, pores and fine lines
- Helps soften the look of acne scars

1927 nm

SURFACE BRIGHTENING

- Targets visible sun damage
- Helps improve uneven-looking tone
- Refreshes dull or blotchy skin

DESIGNED TO IMPROVE THE APPEARANCE OF

- ✓ Fine lines and wrinkles
- ✓ Acne scars and post-acne marks
- ✓ Enlarged pores
- ✓ Rough or uneven texture
- ✓ Sun damage and age spots
- ✓ Uneven or blotchy skin tone
- ✓ Dull, tired-looking skin
- ✓ Selected pigmentation concerns

Treatment settings, number of sessions and recovery vary by skin type, concern and treatment intensity. Melasma and deeper scarring require individualized evaluation before treatment.
