

FIRMER. SMOOTHER. DEFINED.

XERF STRUCTURAL SKIN TIGHTENING

6.78 MHz + 2 MHz monopolar radiofrequency

A noninvasive treatment designed to support collagen remodeling and improve visible laxity across the face and neck.

MULTIFREQUENCY ENERGY. PERSONALIZED DEPTH.

SHALLOW

SURFACE SUPPORT

Targets more superficial tissue for a smoother-looking finish.

MIDDLE

FIRMNESS

Supports visible firmness through customized energy delivery.

DEEP

STRUCTURAL SUPPORT

Reaches deeper tissue layers to support collagen remodeling.

DESIGNED TO IMPROVE THE APPEARANCE OF

- ✓ Loose or sagging-looking facial skin
- ✓ Jawline definition
- ✓ Jowls and lower-face laxity
- ✓ Neck and submental laxity
- ✓ Loss of firmness
- ✓ Smoother-looking skin

Treatment depth, intensity and number of sessions are personalized after evaluation. XERF firms and tightens skin; it is not a weight-loss or fat-removal treatment.
