

"And on this rock I will build my feeder"

Welcome to the wonderful world of birding!

There is no activity in the realm of human experience that brings as much joy to the heart as watching the birds.

Efficient and organized better than most people, these flying dinosaurs continue to illustrate the best we can ever hope to achieve in a civilized society.

Do you need to rest your eyes after a long day of looking at the computer? If so, just turn your gaze towards the window and witness the miracle of Mother Nature's screen saver.

Are you feeling tired by endless paperwork? Rejuvenate your mind, body and soul by walking outside and refreshing the feeder with a scoop of wild bird seed.

Have you lost your way and need the answers to all of life's great mysteries? Simply listen to the birds and realize that they are talking about you.

Without a doubt, the field of ornithology helps people understand their place in this world by putting the scope of their life into perspective:

Giants really do exist outside of fairy tales - as far as the birds are concerned, we are the giants.

So perhaps we should lend our gift of strength to the birds in the community and by doing so discover the bliss of peace and balance.

Bird Feeder Starter Kit:

Feeding Station

Shepherd's Crook

Bag of Wild Bird Seed

Suet Hanger and Treats

Mealworms and Dispenser

Guidebook with Tips and Tricks

*Birds and stick are not included in the Service

About the Service

The greatest obstacle to accomplishing any goal is merely deciding to get started.

While it may be true that every reasonable person on the planet wants to install a bird feeder, only a handful of kind-hearted souls take the initial step on this journey of enlightenment.

It's almost like they need a catalyst.

Narrator: Diamond Catbird Feeding Services enters the chat.

The key benefit of the Service is installing the foundations of the feeder with a guide to ensure hassle-free maintenance for the indefinite future.

After selecting the optimal location for the birds in your surrounding area, a feeder will be installed and supplies for refreshing the station will be provided.

Once this process has been completed the only thing left to do is watch the birds fly to and from the feeder.

Upkeep is extremely simple and takes less than a minute or so per day depending on your level of experience.

Everyone benefits from a feeding station so let's build back better and create an actual Utopia.

Chester the Crow

Ever the stalwart guardian of the bird feeder and surrounding area, Chester ensures the continued safety and tranquility of the community at large.

Members of the Crow Council negotiate with the hawks and doves regarding the available resources at feeding stations throughout the land and ensure equitable distribution.

Additional information about the diplomatic relations between the Crow Council and the various bird tribes can be found in the Guidebook included with the Service.

Frequently Asked Questions

Q: Are birds intelligent?

A: Yes - they discovered water displacement.

Q: What do they talk about all day?

A: Topics include ethics, morality and food.

Q: Do birds use the power lines to recharge?

A: Yes - 9 out of 10 conspiracy theorists agree.

Q: How do you summon a catbird?

A: Leave it treasure in the form of shiny pebbles.

Q: What is the favorite food of a sparrow?

A: It's a tie between carrot cake and cheesecake.

Q: How do you befriend the birds?

A: Show them you care by installing a feeder.
