USPTO Publishes ClearOne's New Networked Intercom Node Patent

Newly published patent extends StreamNet Technology based on Internet Protocols to support LAN based presence and VoIP sessions further building on a powerful unified communications platform.

SALT LAKE CITY, Aug. 24 /PRNewswire-FirstCall/ -- ClearOne (<http://www.clearone.com>) (Nasdaq: CLRO), a global communications solutions company that develops and sells conferencing, collaboration, streaming media, and connectivity systems for audio, video and web applications, today announced they have received notice of publication from the United States Patent and Trademark Office for their patent titled Networked Intercom Node For A Networked Audio Distribution System, # US 2010/0195845 A1.

This patent is related to their StreamNet® technology and provides presence, controls and rich two-way hands-free communications throughout a Local Area Network via Internet Protocols. User generated audio and data content and messages, as well as networked multi-media, can be time and space shifted to allow notification or playback anywhere on the network at any time. The technology enables discovery, authentication and synchronous transmission and playback of time-sensitive media content over Internet Protocol on mobile or user installed presentation devices such as smartphones, smartpads, desktop phones and wall mounted control surfaces.

About ClearOne

ClearOne is a global communications solutions company that develops and sells conferencing, collaboration, streaming media and connectivity systems for audio, video, and web applications. The reliability, flexibility and performance of our advanced comprehensive solutions enhance the quality of life through better communication, education, and entertainment.

NetStreams, recently acquired by ClearOne, delivers the ultimate IP A/V experience by distributing high definition audio and video over TCP/IP networks. NetStreams' products offer unprecedented levels of performance, functionality, simplicity, reliability, and expandability. By combining audio/video content, meta-data and control signals into one stream incorporating industry standards, NetStreams' newly patented StreamNet® solutions are a smart investment, enabling the Power of AV over IP™ - today.

NetStreams' StreamNet technology provides elegant solutions for streaming media & control applications such as digital signage, distribution of HD video and audio, LAN Cloud Matrix Switching™, and audio paging over data networks.
