

## LIMITATOR LM-1

## USB to RS-232/485

## Product Overview:

Limitator LM-1 Handheld Unit

Limitator™ is a simple to use handheld limit setting tool used to setup limits and adjust rotation for shades using Somfy® SDN® motors.

The ONLY limit setting tool made for Somfy® SDN® motors which has collision avoidance.

It can also be used as an interface for laptops or mobile devices equipped with USB ports to connect to any RS-485 or RS-232 serial bus. This enables software applications such as the Modern Atomics Configurator and Somfy® tools such as SET Pro, SDN® Motor Configuration tool, and SDN® Keypad Configuration tool to have access to the RS-485 bus and discover and configure 485 devices such as motors, keypads, RF Transceivers and RF Receivers.

This is also the ONLY USB to 485 interface on the market with collision avoidance.

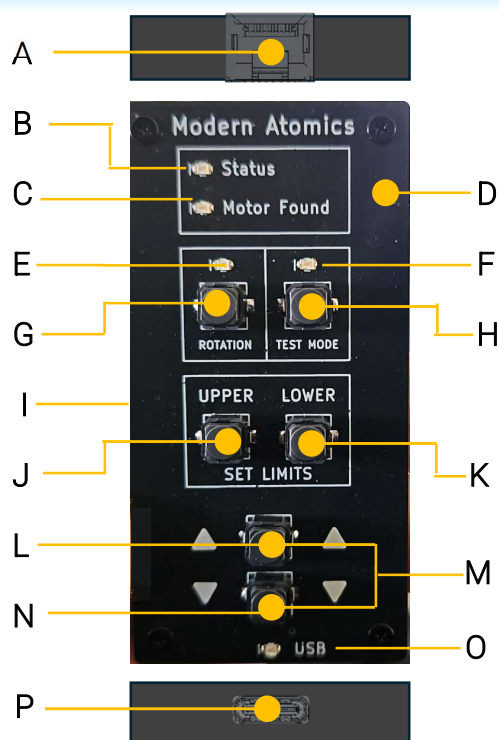

A Motor Tap Breakout Interface is also included to allow quick 485 BUS interconnection at the shade. Handheld unit receives power and 485 communications only flow between the Motor Port and the Handheld Port.

Limitator LM-1 Motor Tap Break out board.

## LIMITATOR LM-1

## USB to RS-232/485

ELEMENT	DESCRIPTION
A	<b>485 / 232 BUS PORT</b> RJ45 RS-485 or RS-232 BUS connection to PDU or MOTOR TAP (Break out board)
B	<b>STATUS LED</b> LED ON = 7-28VDC Power found on RJ45 485 Port
C	<b>MOTOR FOUND LED</b> LED OFF = No Motor found and or more than one Motor found on BUS
D	<b>LIMITATOR LM-1</b> Hand-held Limit setting tool & USB C to RS-485 / RS-232 BUS RJ45 Interface
E	<b>ROTATION LED</b> LED OFF = Reverse Roll / LED ON = Standard Roll / LED Flashing = Unknown
F	<b>TEST MODE LED</b> LED OFF = Limit Setting mode active / LED ON = Test mode active
G	<b>ROTATION KEY</b> Pressing this key will toggle the motor rotation when in the Limit Setting mode
H	<b>TEST MODE KEY</b> When powered by the RS-485 RJ45 BUS Port, a press will toggle between the Limit Setting mode and the Test mode When powered by the USB C Port, a press will toggle between RS-485 & RS-232
I	<b>EXPANSION PORT</b> This 6-pin port is reserved for factory firmware updates and processor diagnostics
J	<b>UPPER LIMIT KEY</b> Pressing this key in the Limit Setting mode sets the motor upper limit to the current position
K	<b>LOWER LIMIT KEY</b> Pressing this key in the Limit Setting mode sets the motor lower limit to the current position
L	<b>UP KEY</b> In the Limit Setting mode a press sends 6 up pulses & a hold sends motor move up commands until you release the key (These commands will go past any current limits). In the Test mode a press will send go to the upper limit (if limits have already been set)
M	<b>UP &amp; DOWN KEYS</b> Press both keys to STOP any motor movement
N	<b>DOWN KEY</b> In the Limit Setting mode a press sends 6 down pulses & a hold sends motor move down commands until you release the key (These commands will go past any current limits). In the Test mode a press will send go to the lower limit (if limits have already been set)
O	<b>USB LED</b> LED ON = USB C port has power from PC / MOBILE Device
P	<b>USB C PORT</b> The USB C port provides a bridge to the 485/232 BUS for using PC motor configuration software
1	<b>PDU RS-485 PORT</b> 5 pole 5.08 Pitch Inverted header for connection to PDU using the Somfy® motor connector
2	<b>RS-485 MOTOR TAP</b> Breakout board for use with the hand-held tool. 485 data does not flow back to the PDU Port
3	<b>MOTOR 485 PORT</b> 5 pole 5.08 Pitch normal header for connection to motor using the Somfy® motor connector
4	<b>HAND-HELD PORT</b> RJ45 Connection to Hand-Held Tool RS-485 Data is only routed to the Motor Port

## Technical Specifications:

TYPE C

- HANDHELD UNIT CONNECTIONS:
  - USB PORT: Type C (5 VDC)
  - SERIAL BUS PORT: RJ45 (7-36 VDC)
  - JTAG EXPANSION: 6-PIN (1.0 pitch)
- MOTOR TAP BREAKOUT CONNECTIONS:
  - PDU PORT: 5 POLE 5.08 PITCH
  - MOTOR PORT: 5 POLE 5.08 PITCH
  - HANDHELD PORT: RJ45

## Parts Included:

- (1) Limit Setting Tool
- (1) RS-485 Motor Tap
- (1) USB C Cable (1M)

## Features summary:

Works with all Somfy® SDN® Motors and Drapes

Qualified with the following Software:

Modern Atomics Configurator Mobile Software

Somfy® SET Pro Software

Somfy® SDN Motor Configuration Software

Somfy® SDN Keypad Configuration Software

## LIMITATOR LM-1

The screenshot displays the Somfy SETPro software interface. The top navigation bar includes 'Dashboard', 'Device Map', 'Group View', and 'Device Config'. The 'Device Config' tab is active, showing settings for a device labeled 'COM3'. The interface is divided into several sections: 'Direction adjustment', 'Motor End Limit adjustment', 'Speed adjustment', and 'Ramps adjustment'. The 'Motor End Limit adjustment' section is expanded, showing 'Set Top Limit: 0 Pulses' and 'Set Bottom Limit: 9518 Pulses'. It includes buttons for 'Set Top Limit At Current', 'Set Bottom Limit At Current', and 'Reset Motor Limit'. There are also controls for 'Continues Movement' and 'Hold to Move' with up/down arrows and a 'Stop' button. A 'Pulse' toggle is visible at the bottom of the limit adjustment section. The left sidebar shows a search bar, 'Add Floor', 'Add Room', and a list of rooms including 'main' and 'Lab (Count: 1)'. The bottom status bar indicates 'RS485 Setting Tool (FFFDFF)' and 'Completed'.
