

PDU CONNECTOR SHOES

RF 2POS & RJ45

RJ45 VERSION

Product Overview:

The PDU Connector Shoe is a part to allow connector changes for a Motor output row on Reaktor or Neutron PDU. For use with Reaktor and Neutron motor outputs. Each row can accommodate 7 motor outputs. Used with popular 485/RF low voltage motors with 2, or 4 conductor terminal blocks with a pitch of 5.08mm or RJ45 connections. Cresnet® and Lutron® have OEM pinouts. Sold as individual 7-port models, up to 2 per PDU and can be mixed as needed such as RJ45 and RF on same PDU
