NEW PRODUCTS

## New Products -- October 2004 Page 3

**NetStreams** Unlike other distributed-audio systems that use separate power amplifiers, NetStreams' Musica MU4602 has amps built into the keypads for each zone. Pads rated to deliver 25 or 50 watts per channel are available, and the 50-watter accepts an optional FM tuner. The Musica controller takes stereo audio from four sources and can distribute it independently to up to six zones. (You can daisy-chain controllers for up to 18 zones.) Through auxiliary inputs on the keypads, a source within a zone can hook up to the speakers in that room. The keypads have LCD screens and window-style menus for easy programming, and codes are stored in the controller so you don't have to tediously program each pad. Prices: MU4602, \$1,400; keypads, \$299 to \$499 each. [www.netstreams.com](http://www.netstreams.com), 512-977-9393
