

# Dart

# D

A Dart is a fold sewn into fabric to a garment, especially for a woman's bust. They are used frequently in all sorts of clothing to tailor the garment to the wearer's shape, or to make an innovative shape in the garment.

There are many types of dart but the most common is a standard dart. A standard or plain dart is open at one end, often looking like a triangle on the pattern piece, and can be used at the bust or waist
