

Double-sided Seam Tape

Double sided adhesive seaming tape is available in 6mm or 9mm width. It is used to hold fabric together while sewing. This tape is LOW TACK and will not mark fabric or make your machine needle sticky. The tape is sticky on both sides and is peeled from a carrier cover.

Double-sided tape can also be used to:

- hem fine fabrics;
- control knit hems and seams;
- support bias tubes;
- position a zipper;
- match plaid and stripes;
- stabilise buttonholes.
