

Stuffing

Stuffing is a soft material (such as cotton or polyester) used to fill upholstered furniture, cushions, bedding, toys etc.

Alternatives to toy stuffing include:

- Old tights or socks. Nylons work great, but woolly ones will do too;
- Worn out t-shirts or jumpers;
- Tissues or tissue paper;
- Newspaper;
- Plastic bags;
- Packing materials;
- Toy stuffing from another toy;
- The filling from a pillow.
