

BONYX

Find your real skin

Bonyx LC Rebo Serum improves skin texture, smooths fine lines, and restores a healthy glow for all skin types. This lightweight, fast-absorbing formula uses Hugro Peptides developed by biotech labs to support natural skin repair, improve elasticity, minimize pores, and calm stressed skin.

Benefits

- Helps reduce the appearance of pores, fine lines, and wrinkles
- Improves skin texture and firmness
- Boosts hydration and calms stressed skin
- Leaves a healthy glow without oiliness
- Suitable for all skin types including sensitive skin
- Great for post-treatment recovery

Key Ingredients

- EGF & KGF2 - support skin repair and smoothness
- FGF1 & PDGF BB - lifting and firmness support
- IGF1 - nourishes and strengthens skin
- SOD1 & AH - antioxidant and anti-wrinkle support
- LCBTX peptide - topical wrinkle-smoothing peptide

Clinical Peptide Technology

LCBTX peptide is BONYX LC REBO's targeted topical wrinkle-smoothing peptide. In this lightweight serum, it helps soften the look of expression lines while supporting smoother, firmer-looking skin. Hugro Peptides, growth factors, and antioxidant support help promote skin repair, elasticity, and post-treatment recovery after microneedling and RF. Designed for professional use, it helps improve texture, refine the look of pores, and restore a healthier glow.
