

My name is Sean Sturm I've been around this area for around 8 years off and on. I've spent that time working off and on and just fell on hard times which resulted in a life of drugs and not really getting by at all. Around 7 or 8 months ago I decided I had enough of the drugs and life style it brings and made the decision to get clean and try and better my situation with my wife Kelly and got a job working for a man here but in Huxley bay building a house boat. I needed help though and had never really done so I went to Shelby county outreach and was referred to Tri County and from the time I stepped through the door to now I've never felt judged nor looked down on for my past which is so important to a recovering addict. They took me and my wife in gave us food to take to start out with and most important they gave us shelter till I started my job after being homeless for over a year it was such a blessing to be able to shower and sleep in an actual bed, and then also gave me gas cards to help out to get there to my job for my first day. Without these people here at Tri County I 100 percent would not have made it to my job and in turn would have probably went back to that lifestyle they are a true blessing and honestly saved my life because I had nothing they were my final chance and they showed up. I thank them from the bottom of my heart and would in the future if ever needed would be there for them in a heart beat.
