## BELGRAVIA Token White Paper

### Introduction

The **BELGRAVIA Token** is a luxury-focused digital asset that redefines how the world's wealthiest individuals engage with exclusive services, assets and experiences. Built on the **Ethereum blockchain** as an ERC-20 token, BELGRAVIA represents both prestige and flexibility, offering an elite gateway to the finest luxuries of life. Backed by a **Bitcoin Treasury**, BELGRAVIA provides an added layer of stability and trust, ensuring that token holders not only access premier luxury services but also enjoy the security of Bitcoin as a store of value.

### Our Vision

BELGRAVIA's mission is to offer a unique convergence of wealth, technology and luxury. By combining cutting-edge blockchain solutions with high-end services and experiences, BELGRAVIA transforms a token into more than just a financial asset—it becomes a symbol of elite status, trust and lifestyle.

### Token Overview

**Blockchain:** Ethereum (ERC-20)

**Token Symbol:** BLGV

**Total Supply:** 2,100,000,000 tokens

**Treasury Backing:** Bitcoin (BTC)

**Use Cases:** Asset ownership, luxury services, fractional ownership, exclusive access, rewards, digital experiences, high-value investments.

**Goal:** To integrate luxury services with tokenization, offering holders privileged access while benefiting from the flexibility of blockchain and the security of Bitcoin backing.

### Bitcoin Treasury Backing

The BELGRAVIA Token is backed by a substantial **Bitcoin holding** as part of its treasury. This BTC reserve serves as a foundation for the token's value, offering stability and long-term trust. Bitcoin, as the most widely adopted and decentralized cryptocurrency, provides an immutable reserve that anchors BELGRAVIA in an increasingly volatile digital world. Token holders benefit from knowing that their tokens are not only linked to

luxury services but are also secured by a valuable and reliable asset in the form of Bitcoin.

### Benefits of Bitcoin Backing

- **Increased Trust:** A BTC-backed token provides tangible value through an asset widely recognized for its reliability and long-term appreciation.
- **Financial Stability:** The BELGRAVIA treasury allows for stable operations, ensuring a steady value floor for the token based on the Bitcoin held in reserve.
- **Diversification:** Token holders are not only exposed to luxury services but also gain an indirect exposure to the growing value of Bitcoin, combining both lifestyle and financial benefits.
