

DA 5.0 - Adaptive Cruise Control (ACC) to 0mph

- **Detroit Assurance 5.0's ACC to 0mph** automatically adjusts the truck's cruising speed to maintain a safe following distance from other vehicles in its path **down to 0 mph**
- In stop-and-go traffic, if the vehicle in front stops, your truck will also come to a stop and hold indefinitely
- If the vehicle in front causes the truck to stop for **2 seconds or less**, the truck will resume at a safe following distance once the vehicle ahead moves again
- If vehicle in front is stopped **2 seconds or more**, driver must depress the accelerator or press the ACC resume button to start again.
