

## COLLEGIATE SCHOOL | NEW VIRTUAL CLASS – 2024-2025

### Introducing Virtual Fridays!

Universities and colleges nowadays offer virtual and hybrid learning classes. As we take pride as a college preparatory school, we would like to add this new aspect to our curriculum to ensure our students are prepared for their college days. Online education can be beneficial for those students who like to work at their own pace. This can only enhance our structured curriculum and give the students a sense of independence and responsibility. If you have any questions about our new program, please feel free to contact us!

As we introduce this new format of learning students can stay at home, this will not affect attendance or tardiness. A supervised classroom will also be available if the student cannot stay at home.

Laptops and electronic devices are not provided. Each student will be assigned an e-mail to log into our Google classroom application.
