

# Divine energy clearing

## *to transform your space and life*

**Energy clearing is an ancient sacred practice** that enhances our physical space by healing emotional and spiritual congestion (negative patterns, blockages, destructive influences) that disrupt our lives.

Traditional societies are attuned to the deep connection between people and their natural environments. Just as thoughts, emotions and actions leave an imprint on the soul, they also leave a residue in our brains and bodies. Sometimes these past events can be so negative they undermine our health, finances and relationships.

Energy clearing cleans out these dark and destructive forces, balances the energy and allows free flowing energy to support of your health, abundance and success.

Onye Onyemaechi is a gifted African and American healer who has the power to see into both the visible and intangible realms. Tapping into the universal Divine Grace, Onye is able to clear blockages and to help resolve past and present issues to promote the foundation for a blessed and successful future.

Our home was repeatedly broken into when it was renovated even after alarm system was installed. Thieves stole our televisions, our household goods and precious things. Finally we called in Onye. He energetically cleared and blessed our house. We have not had any troubles since. D.W.

No one would come to view my house and land. After Onye's ceremony, I received a good offer and sold quickly! C.W.  
The house we bought and renovated was over a hundred years old. In order to make a new start, we had Onye energetically clear the house and estate. It is all bright and lucid and since then I feel very safe and protected in our new home. K.M
