We scan each frame from your film and create a file for each reel.

The file will then be converted to an AVI file. Minimum charge is \$65. Free pickup and delivery in Derby area for \$100 or above orders. (please call in advance for meeting place, time and date.)

Note: If you have Super8/16 sound the cost is 30% upcharge of the total. Many old Super 8 sound reels may not have sound so we cannot guarantee it's sound quality but we do have to charge to go thru the process to be able to find out if there is sound. With the old S8 sound technology required a microphone and a battery in the mic which when it got weak there was no sound even though it was sound movie film. You can check the film on the emulsion side for a grey or brown color edge on 8mm or 16mm magnetic sound track. Some 16mm may have optical sound.

0-250ft. .20ct/ft; 251-500ft. .18ct/ft; 501-1000ft .16ct/ft; 1001ft+ .14ct/ft

Please put silent films in one order and the sound films in another order.

Check which one is in this order:
