

For Immediate Release
July 10, 2020

ScrapSource, based in Dallas, Texas, has entered into a multiyear agreement with Insteel Wire Products Company, based in Mt. Airy, NC, to provide scrap management services at all of Insteel's 10 manufacturing plants throughout the United States.

"We are pleased to be awarded this contract," says Larry Olschwanger, President of ScrapSource. "We have known the Insteel organization for many years and they recognized the value to consolidate all of their plants scrap under the ScrapSource umbrella. Insteel is a world-class organization and leader in their industry and we are thrilled to now call them a client".

Robert Welch, Director of Materials at Insteel, says, "The Insteel/ScrapSource program creates significant value on the scrap metal generated by our plants, while at the same time implementing industry best green practices".

About Insteel:

Insteel Wire Products Company is a wholly owned subsidiary of Insteel Industries, Inc. and is the nation's largest manufacturer of steel wire reinforcing products for concrete construction applications. Insteel manufactures and markets prestressed concrete strand and welded wire reinforcement, including engineered structural mesh, concrete pipe reinforcement, and standard welded wire reinforcement. Insteel products are sold to manufacturers of concrete products that are used in residential and nonresidential construction.

About ScrapSource:

Founded in 2010, ScrapSource is a boutique scrap management firm that provides innovative revenue enhancing solutions for companies generating scrap from their manufacturing processes. ScrapSource helps companies make smarter scrap recycling decisions while improving revenue and implementing industry best practices.
