

Introduction to the Dione Ecosystem

Let's start from the beginning...

We start with one of the most influential archaeological finds in history, called the Nebra Sky. The Nebra Sky disc headlines a primeval representation of astronomical wonder, and is “one of the most significant archaeological discoveries ever.” The Nebra Sky has 5 components:

- Moon;
- Sun;
- Stars;
- Horizon Band;
- Solar Boat.

The Nebra Sky is not only a symbol marking the beginning of, in world history context, The Bronze Age, but it also is a symbol of major influence. Influence endorsing the abilities and knowledge of the people, whom happen to be our ancestors, dating back thousands of years. Influence proving confidence in the origin of the human brain and its ability to make decisions based on close astronomical observation. Taking into account angles, patterns and tendencies of the Sun, our ancestors were able to analyze and execute important decisions to further evolve and better the human race. And lastly, it provided inspiration to some of the greatest, and earliest, Decentralized cryptocurrency Ecosystems, designs, and yes, logos.

Staying on the topic of astrology, a past impact to the Dione moon caused a mysterious, but clean, 180° turn. The turn strengthened the moon, and gave it a different perspective of the Universe surrounding it. Dione Protocol symbolizes this 180 degree notion, and has a mind of its own.

I am not going to fill this Medium with empty promises. I am not going to fill this Protocol with abandoned commitment. To promise a delivery and to miss that delivery's deadline is to mislead, to manipulate, and to fail, whether it is in my, or "our," control or not.

The universe has put us all here, in this point of time, like stars, we're the Diamonds in the Sky. We are a mind of our own now. Today, Diamonds in the Sky, inspired by the Nebra Sky, I introduce you to The Dione Ecosystem.

1. Dione Wallet

We begin with the Dione Wallet. Fundamentals are absolutely key as a Protocol and as a whole.

Safety and security in DeFi is something that I am, beyond words, all-for. As I have stated, it is key that we now, as early investors in DeFi, work towards a safer future, in conjunction with ease and a low barrier to entry, for newcomers of DeFi.

It is no secret that DeFi poses a major safety/security risk to, really, all investors.

With cross-chain capability;

Dione Wallet: focused on safety, security, and the host of the Dione Blockchain to come.

Date Announced: August 20

2. Dione Swap

Have you ever tried to explain to a friend/family member/colleague how you buy and sell DeFi cryptocurrencies with the immediate reaction of a blank state?

The Dione Swap will be developed with full intentions of solving the complexity of purchase to the general population. As cryptocurrency, and more specifically, DeFi, gain mainstream momentum and spread to the masses, it is ever so important to be the leaders of true education and simplicity.

Dione Swap will be a cross-chain capable swap and Bridge service.

Most importantly, Dione Swap will be the place to go once smart contracts are implemented to the Dione Blockchain, further down the line.

Date Announced: August 20

3. Dione Blockchain

You read that right. Dione is developing its very own blockchain.

Dione Blockchain is a decentralized protocol that empowers safe, secure and energy efficient transactions. It is to be built upon the fundamentals of blockchain technology and will be heavily focused on the transmission and security of all data.

Dione Blockchain — a Protocol focused on safety and security, assisted by Renewable Energy.

Date Announced: August 20

4. Nebra

Nebra is power; the generator of the ecosystem. Nebra is Dione, tied together. My idea of assisting the operational energy consumption of a safer decentralized ecosystem with renewable energy will come to life.

It is Dione's renewable energy innovation that I am thrilled to present to you, first hand, tomorrow!

Date Announced: August 20

5. Diamonds in the Sky

Surrounding the ecosystem stands the true stars. Our Diamonds in the Sky. These Diamonds are not just any ordinary Diamonds, but Diamonds that were attracted together by the force of energy. Each member of these Diamonds are here today, to be a part of a long and glorious journey together. A journey, much like the experience of the people of The Early Bronze Age, that takes on the mission of finding the real beauty of the Universe.

Date Formulated: August 14

In Closing

More specific articles will come, with dates in which will be outlined in the August 20th post regarding the "Roadmap." There are also a few surprises, you may or may not be expecting. Articles to be presented to you that are not mentioned here.

I have officially introduced you to The Dione Ecosystem, (or perhaps ... only part of), and am proud to let you know that development is in progress. Combining each component, complementing each other and

working in correlation, represents power. I present to you, Dione, the true moon.

A new journey with exciting opportunities.

The vision that was once blurry is now more defined.

- The CEO of Dione Protocol.
