Join Virginia Children's Engineering Council to Network and Share Best Practices

When you join VCEC, you connect with others who help children grow through technology and engineering at the PreK-5 level. Network, gain activities that target SOLs, write articles for the journal, grow leadership and presentation skills… all through an organization like no other.

Right now, membership is free! Take advantage of that. Go to membership link to become part of the support for children! We would love for you to join!
