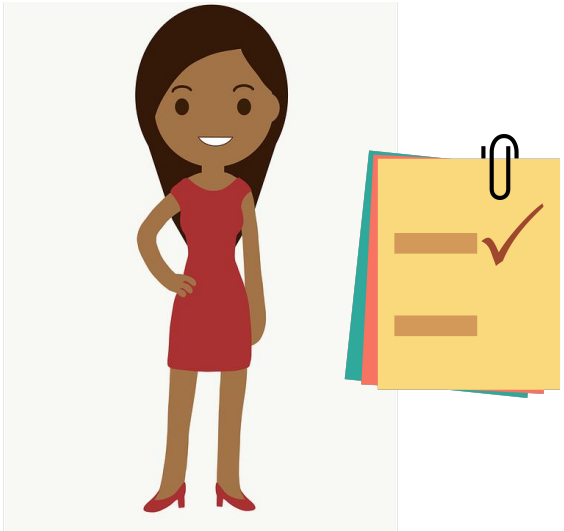
What can it do for you?

TSM Ternary Security Model™

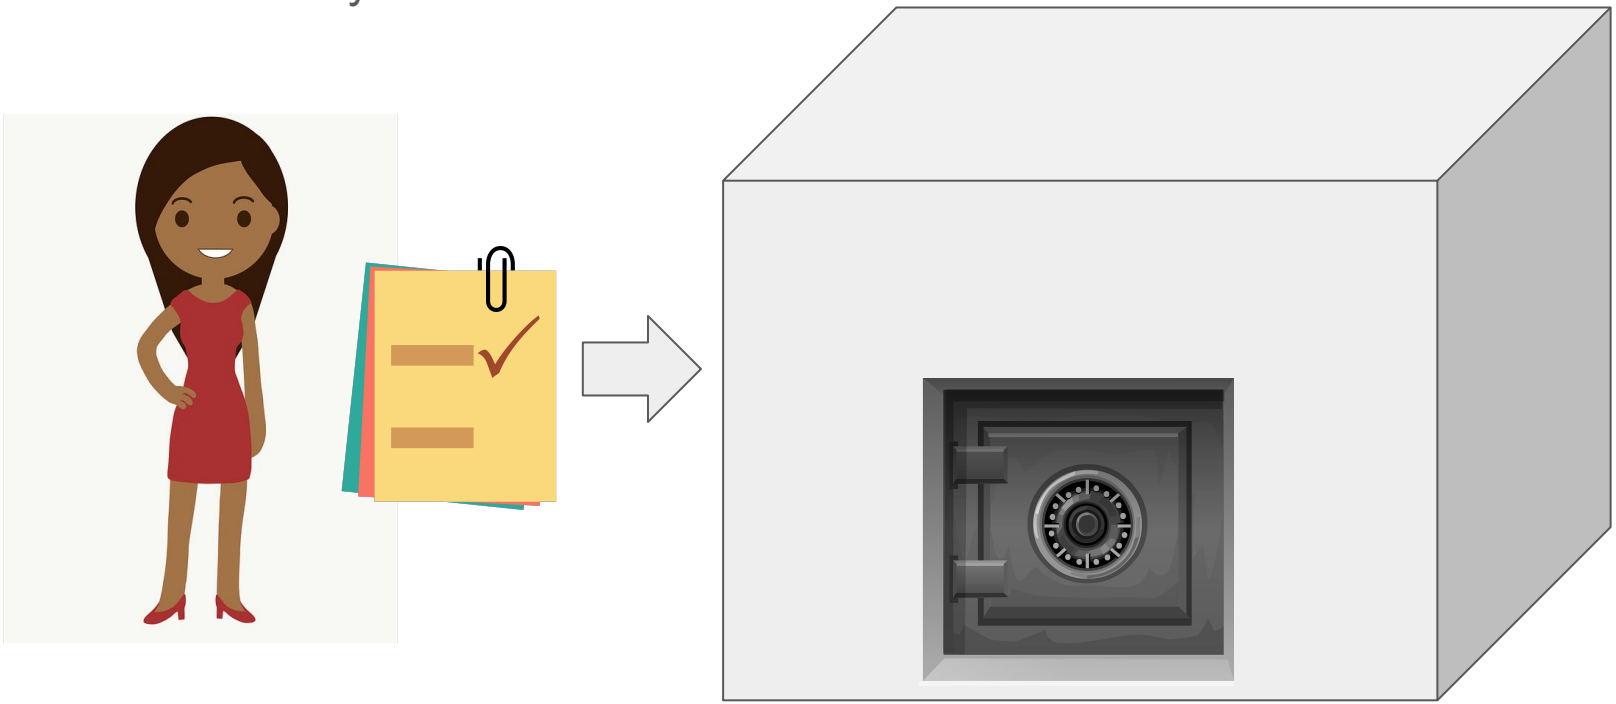
Digital Lockboxes

When it comes to protecting data…



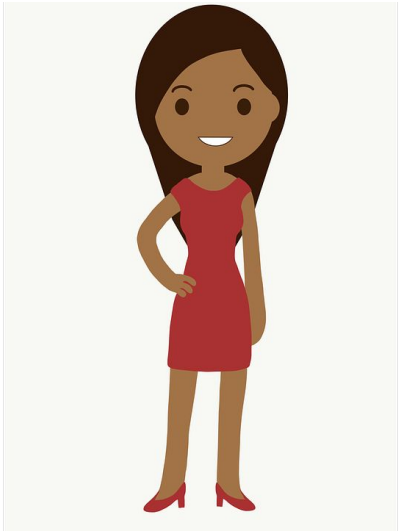
Digital Lockboxes

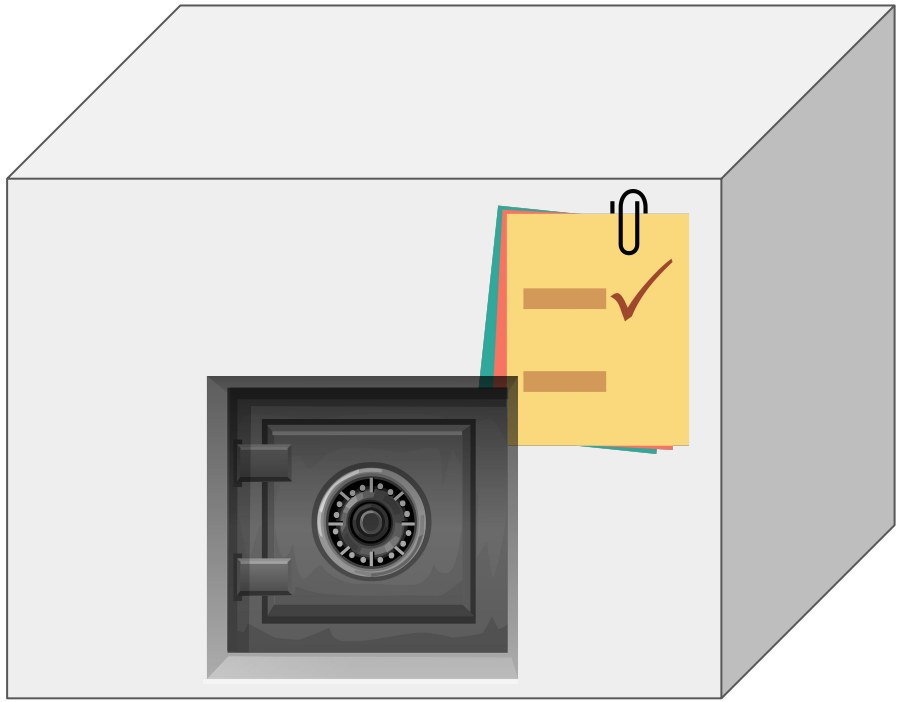
Digital lockboxes are very secure



Digital Lockboxes

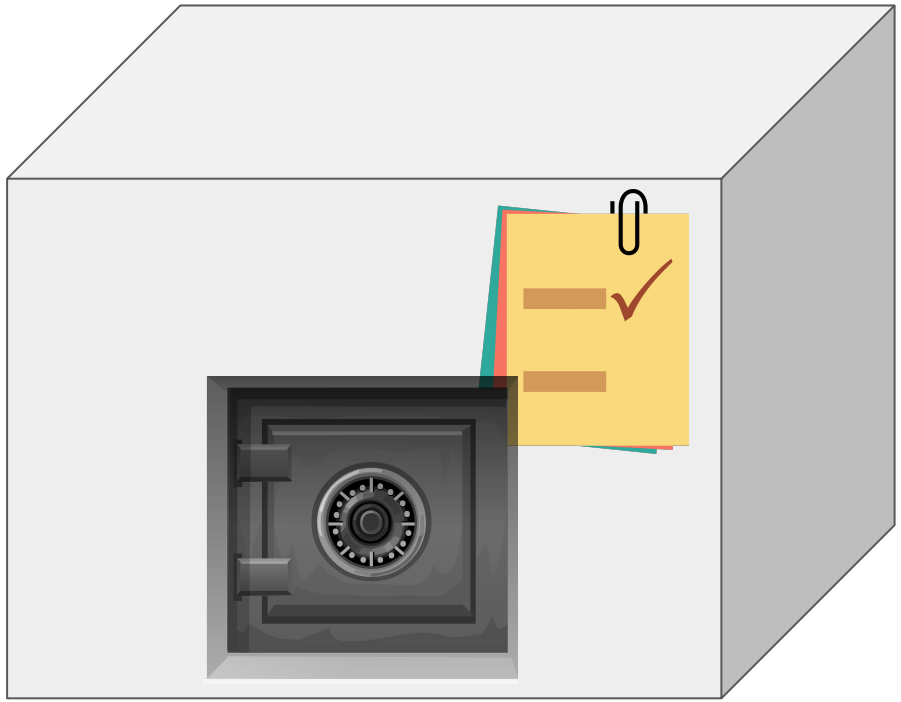
At protecting digital assets





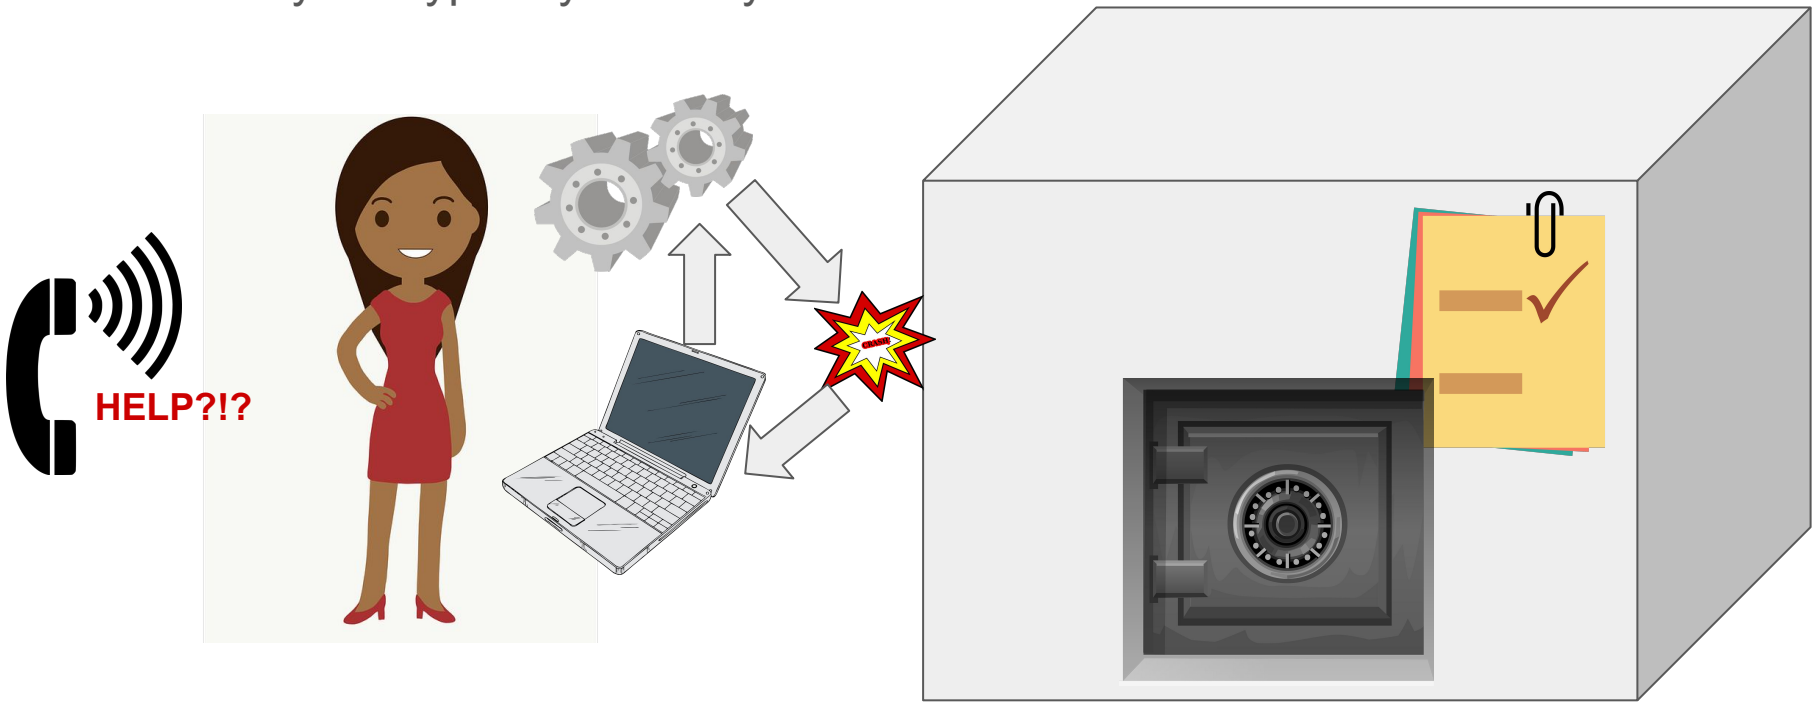
Digital Lockboxes

But can be hard to work with when data is needed…



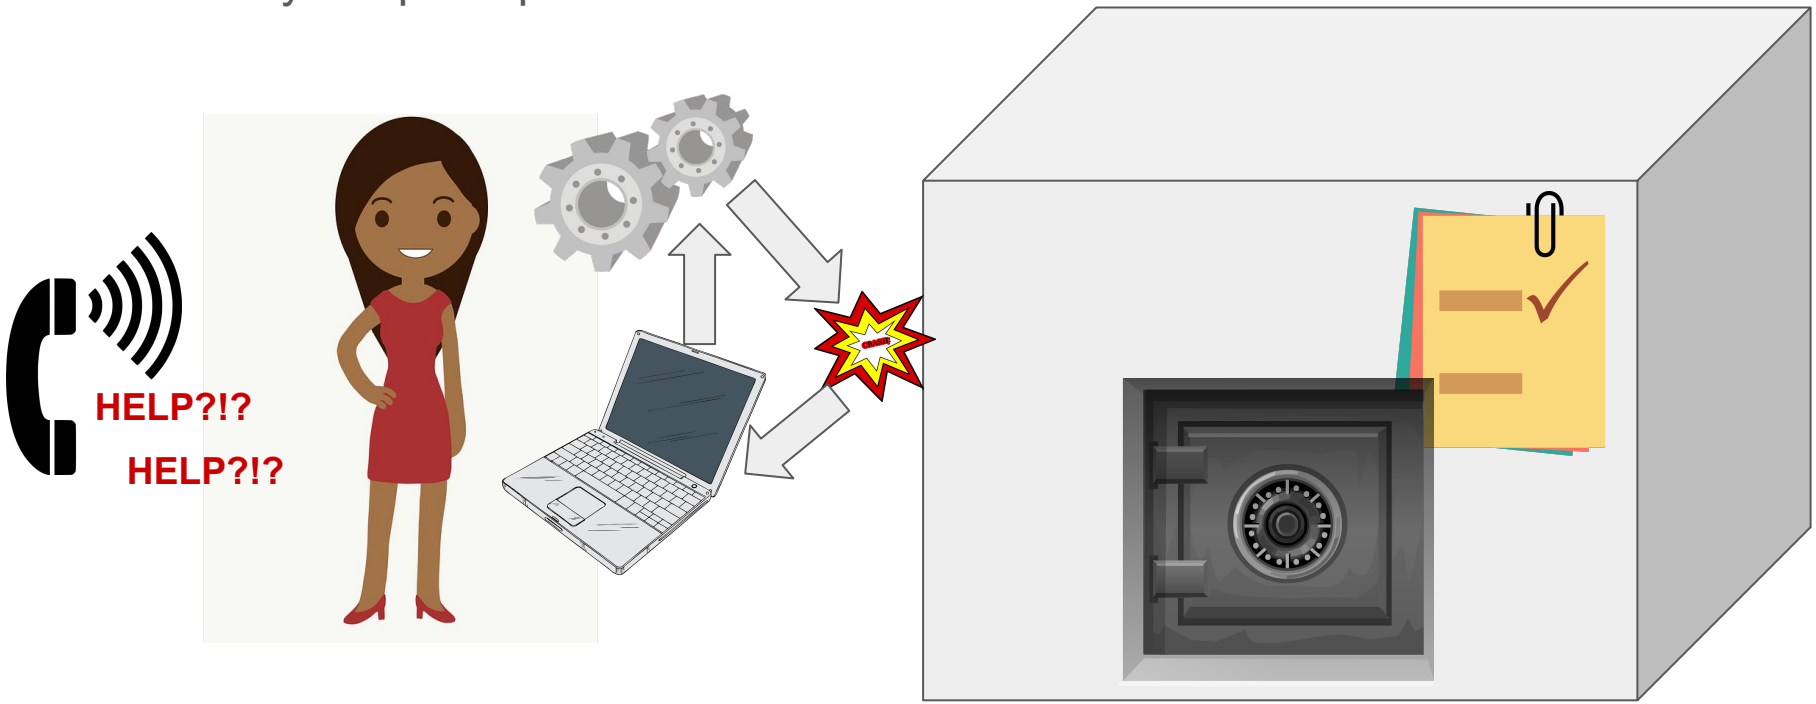
Digital Lockboxes

Because they are typically not very auto-interactive…



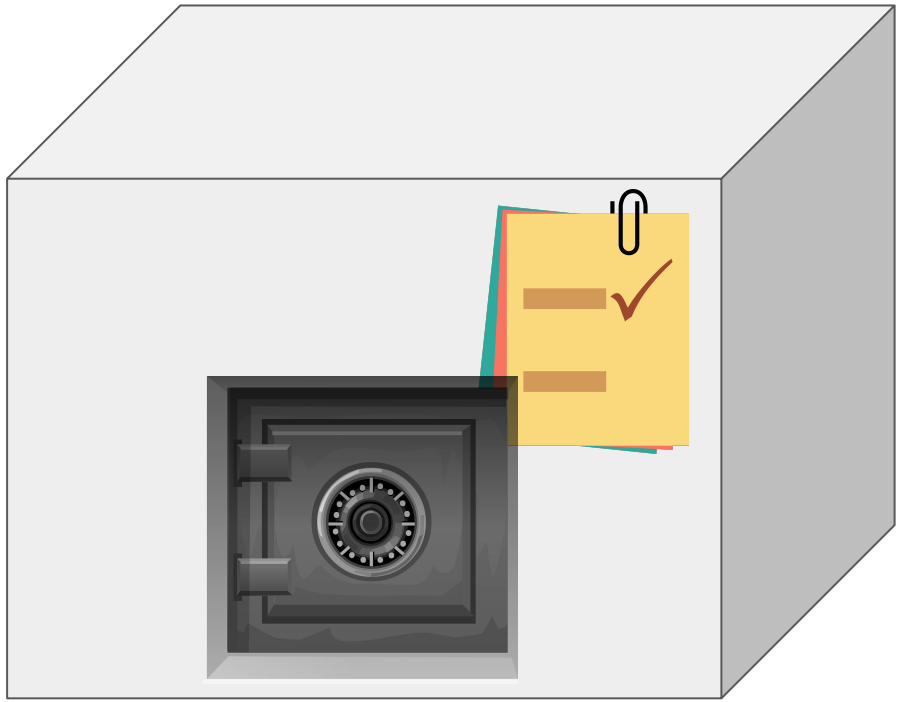
Digital Lockboxes

And not easy to open up for use…



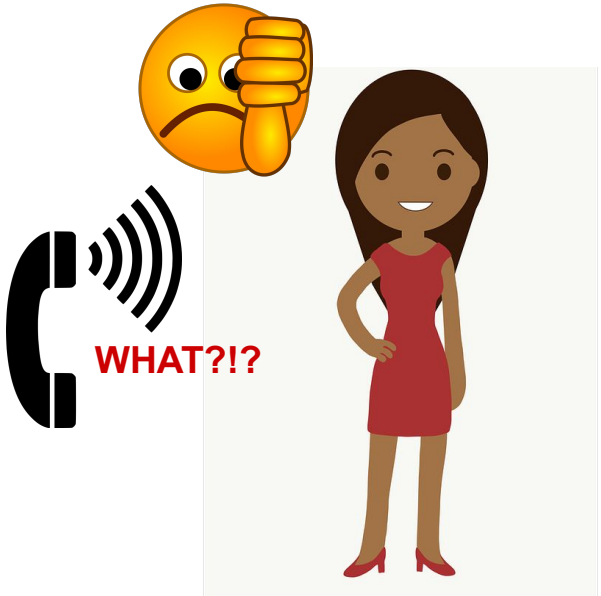
Digital Lockboxes

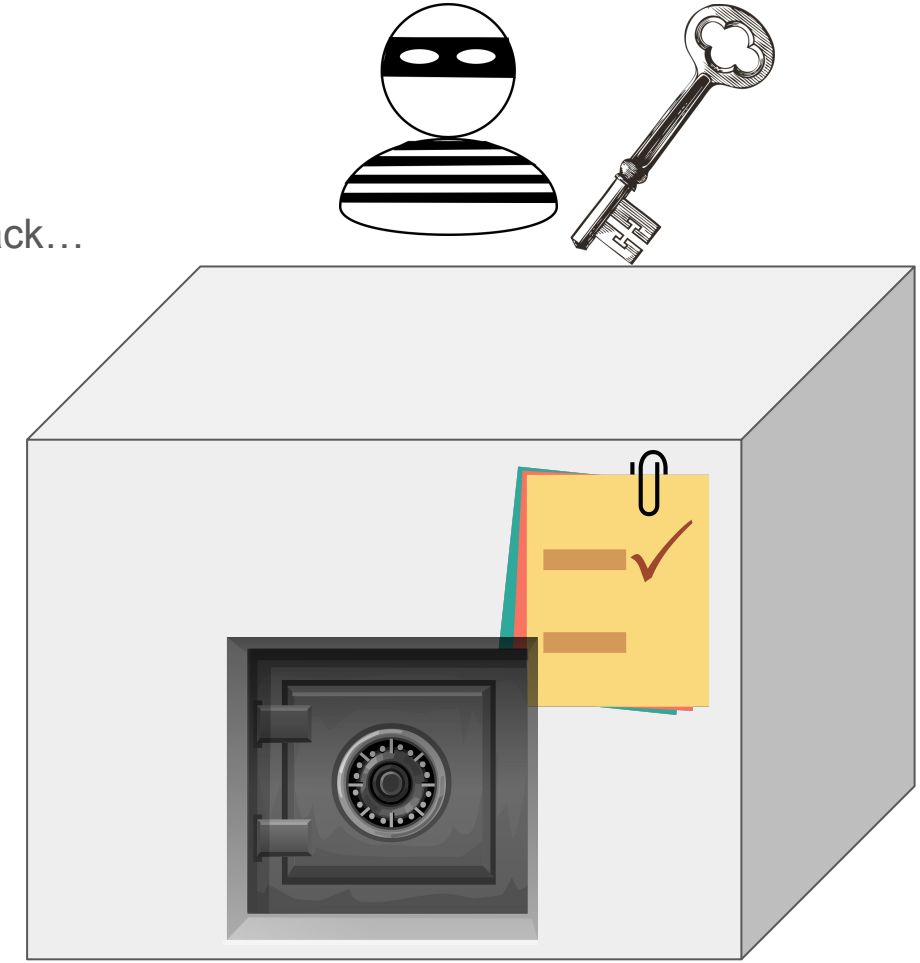
Without manual intervention with the key…



Digital Lockboxes

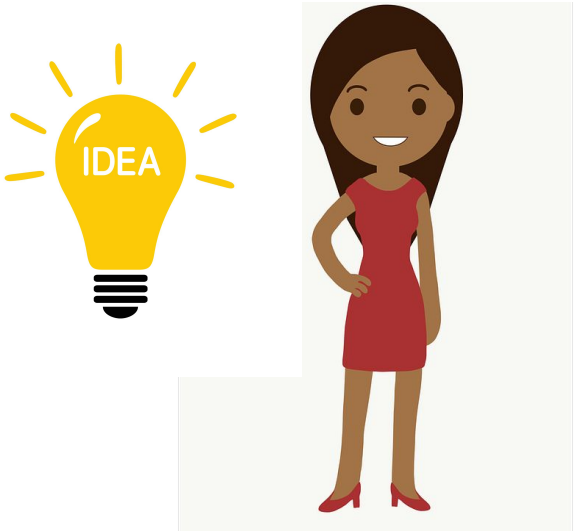
Which also makes them vulnerable to inside attack…

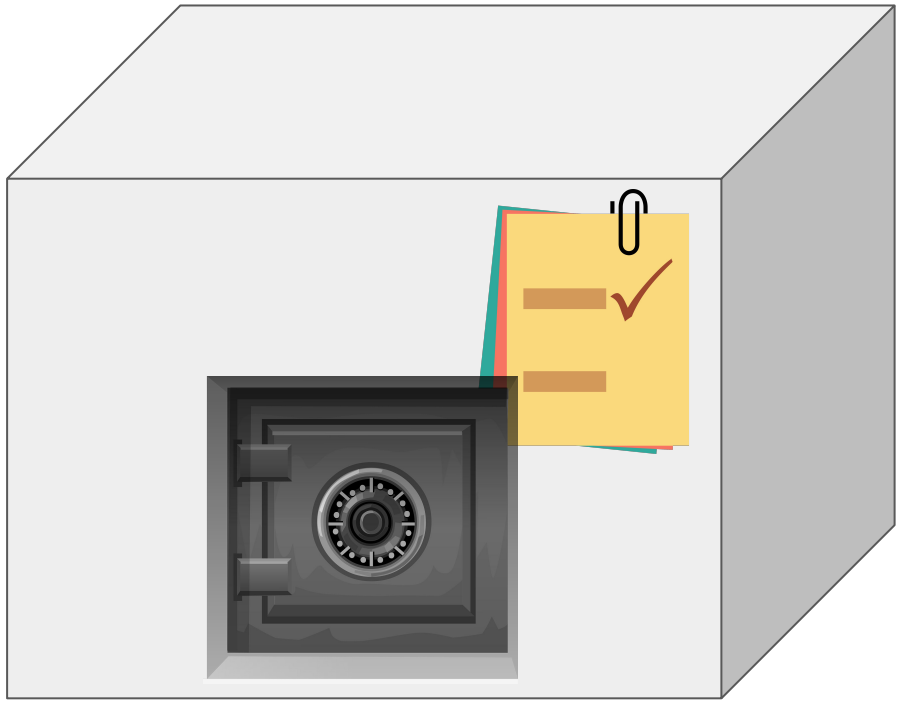




TSM Cyber SCIF

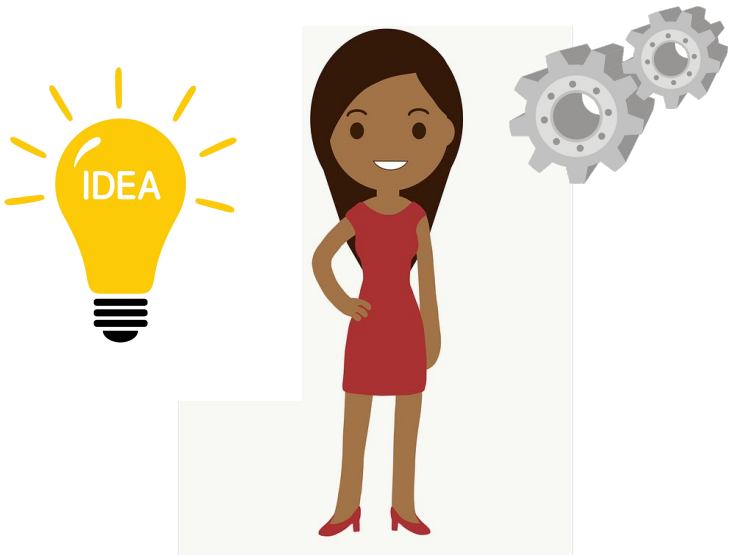
But what if you could customize your lockbox…

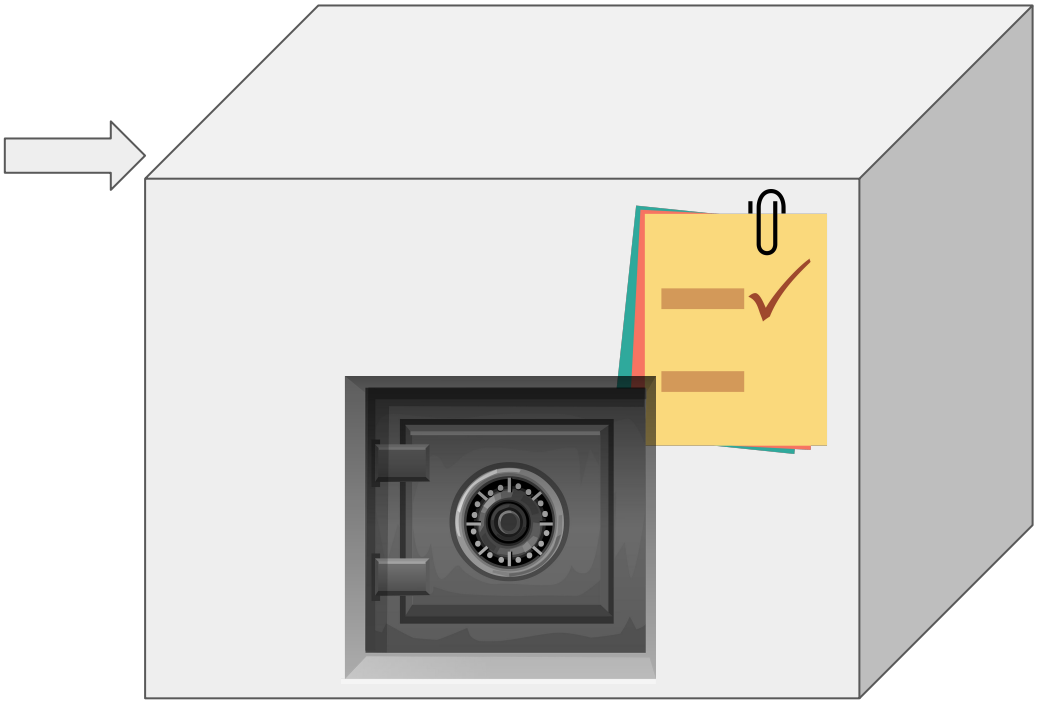




TSM Cyber SCIF

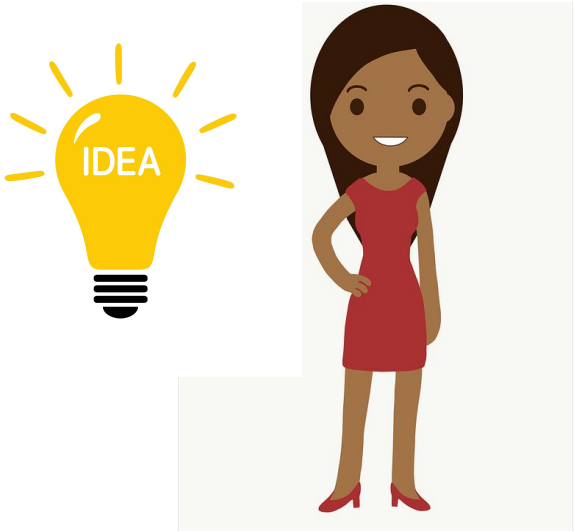
To make it interactive

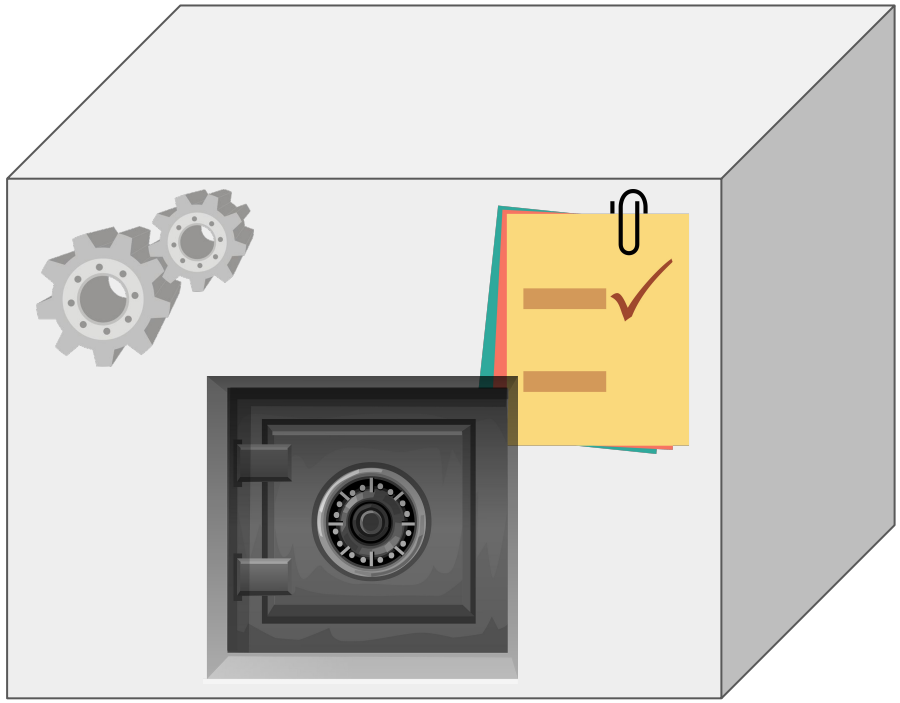




TSM Cyber SCIF

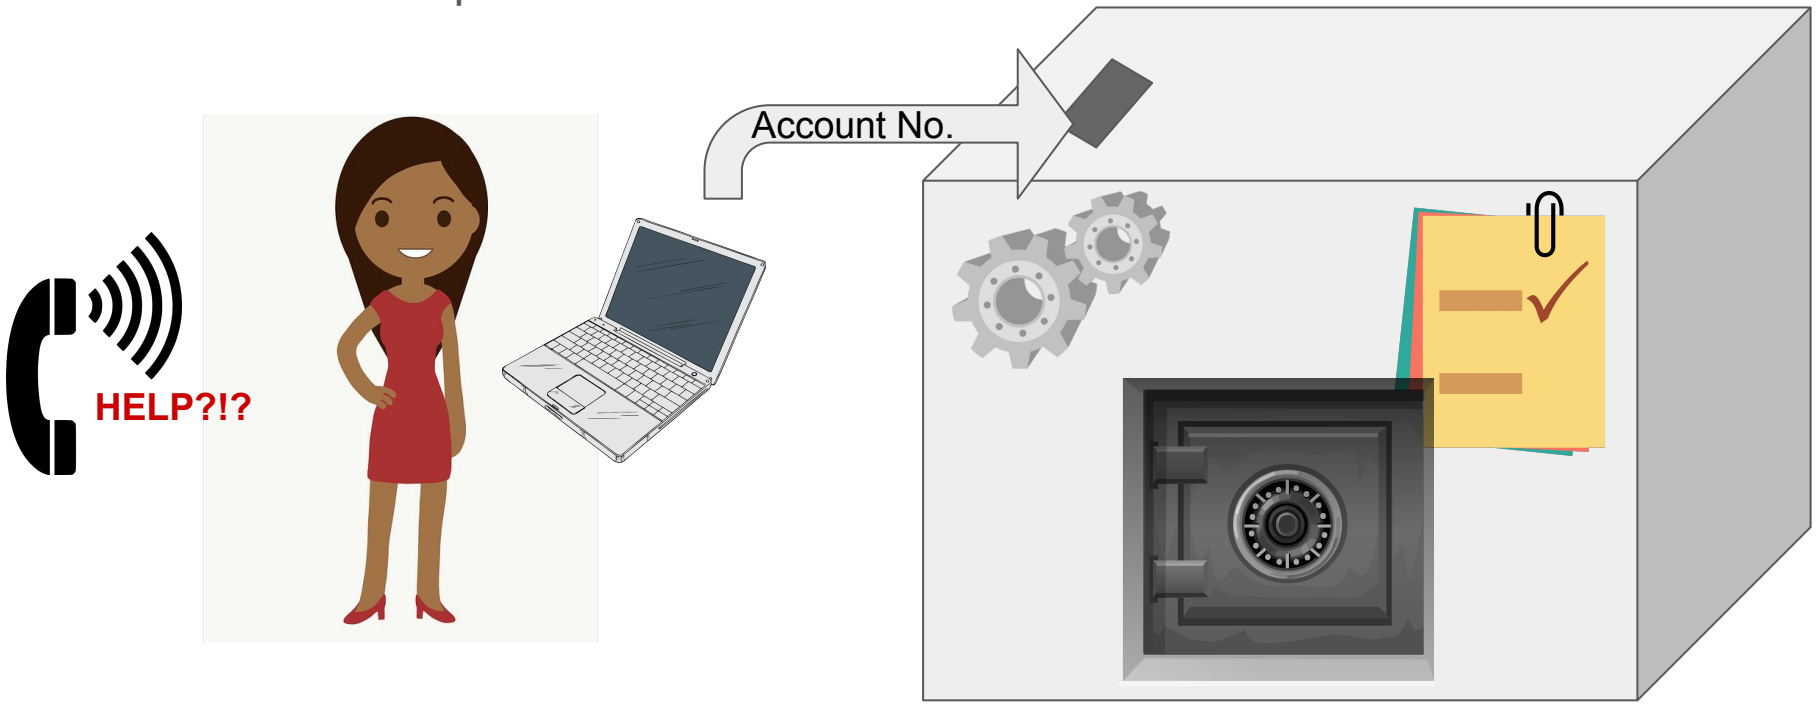
With your logic and AI inside…





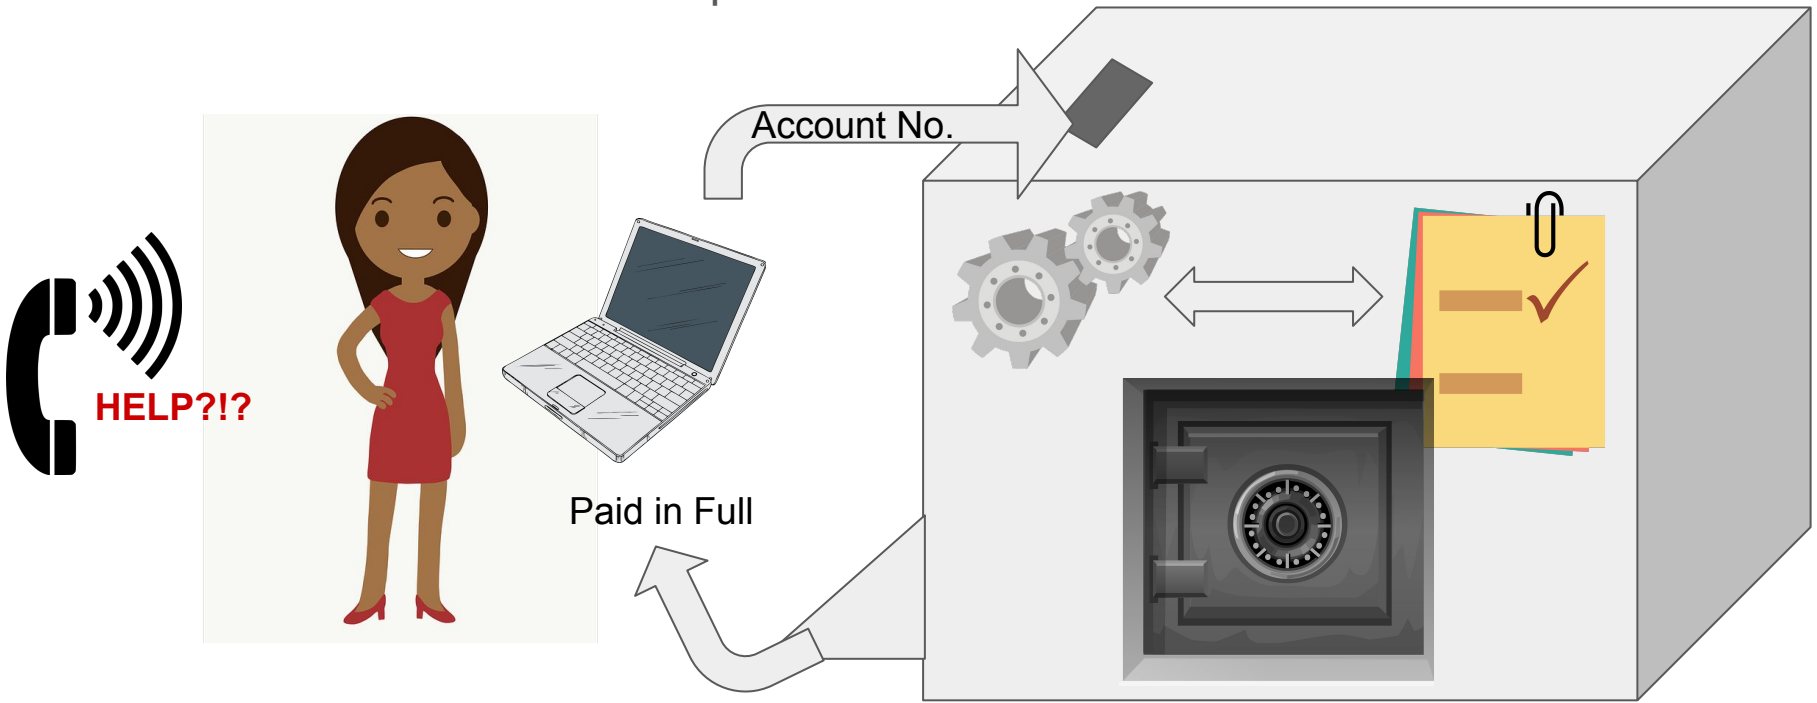
TSM Cyber SCIF

And customizable inputs…



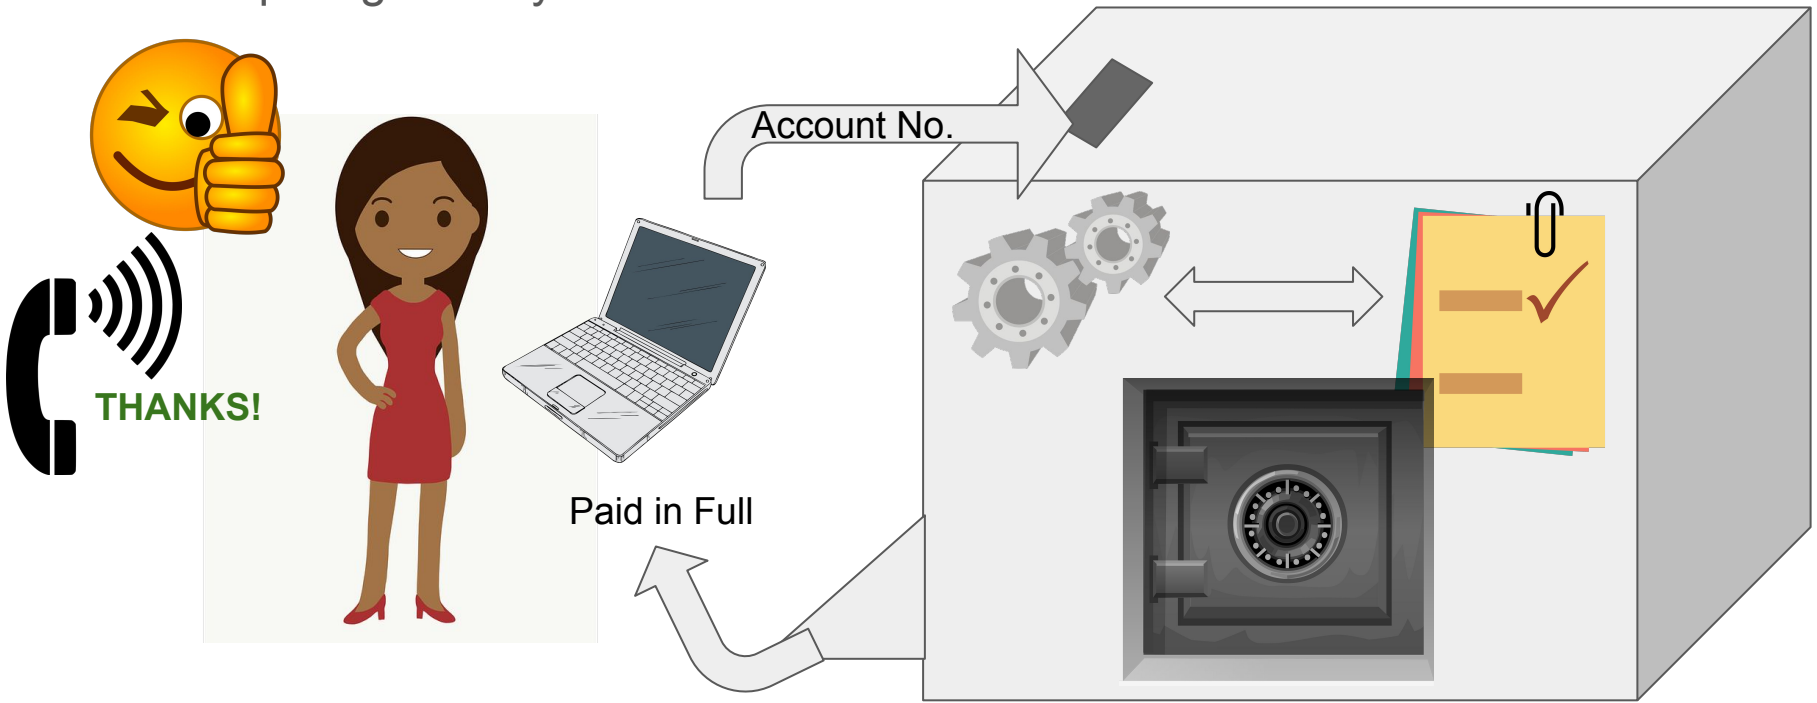
TSM Cyber SCIF

To return actionable but safe outputs..



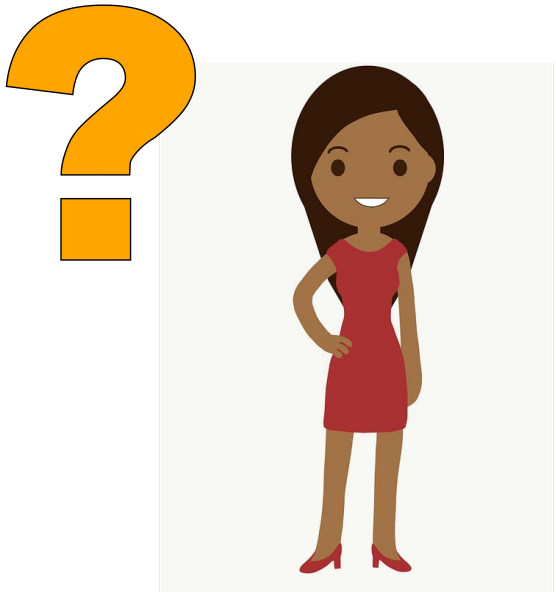
TSM Cyber SCIF

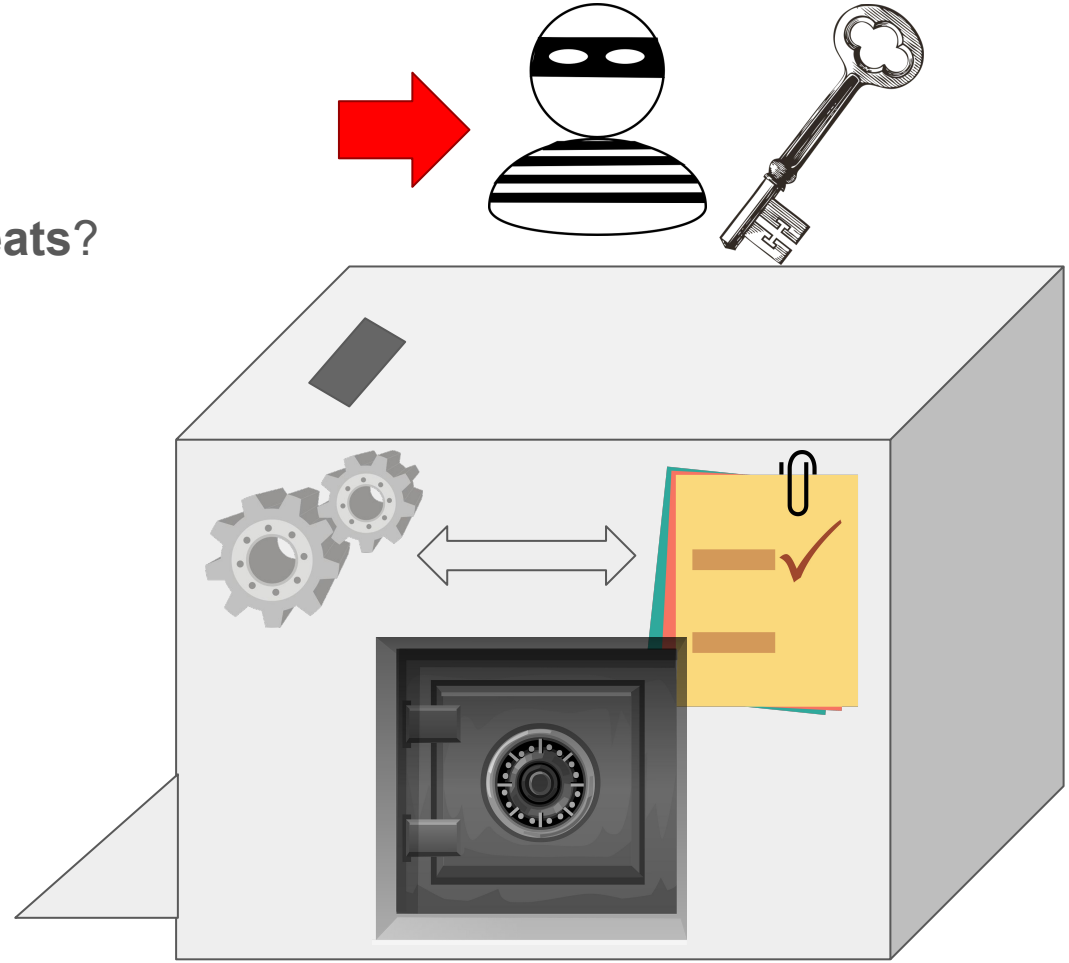
Without requiring the key or manual intervention…



TSM Cyber SCIF

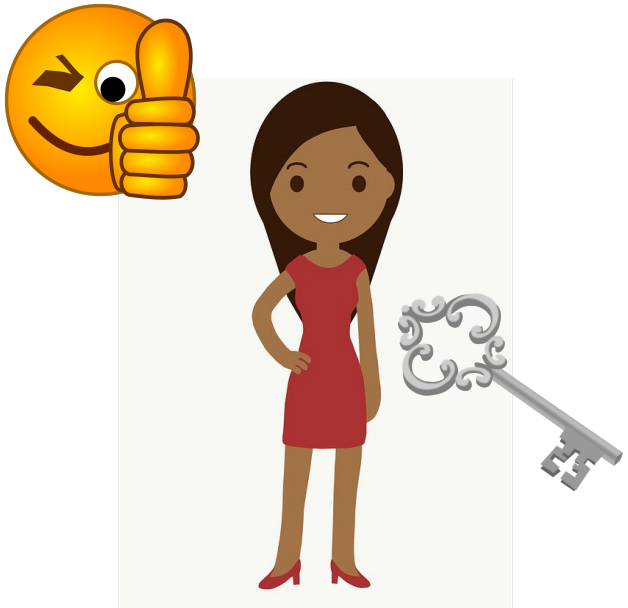
But what about those **insider threats**?





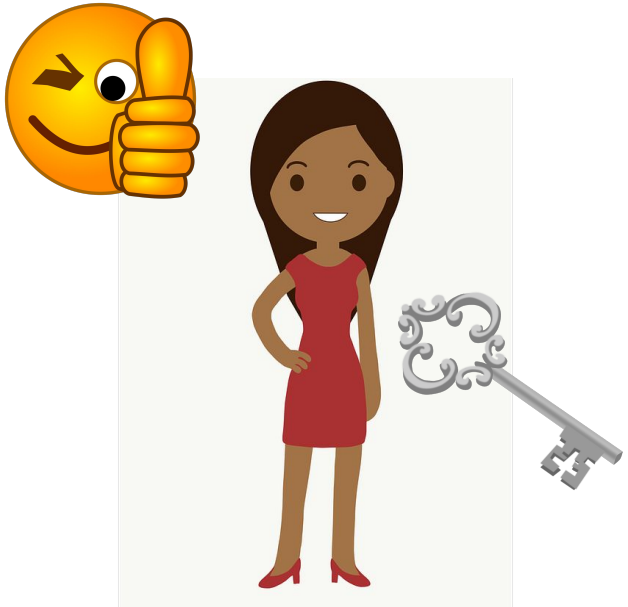
TSM Cyber SCIF

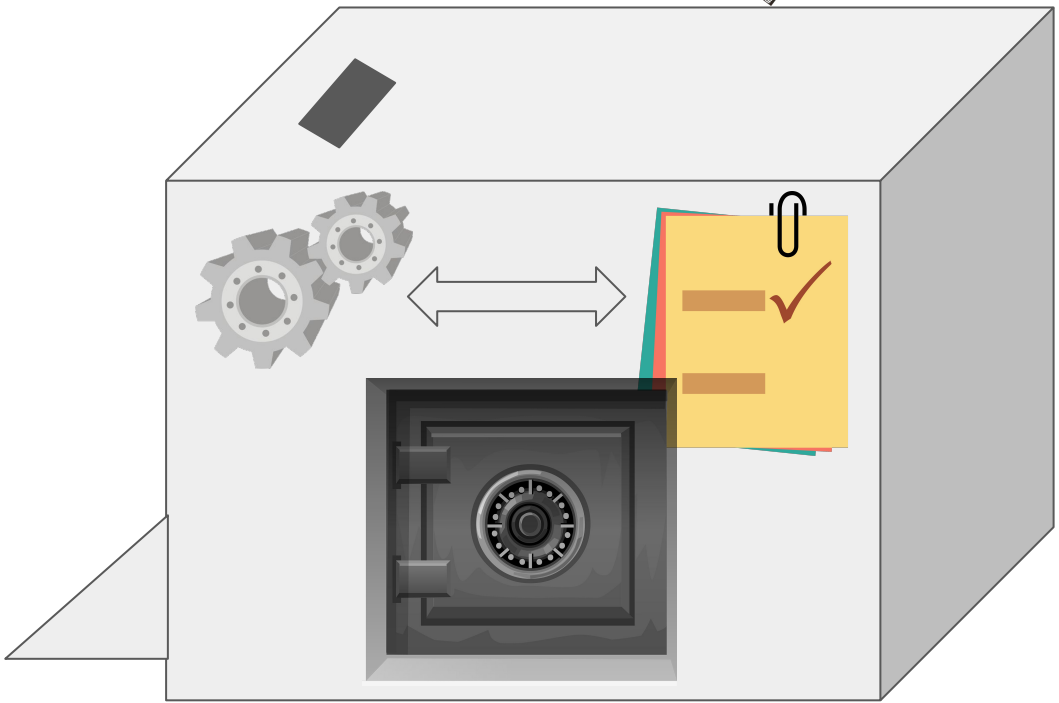
You can require **multiple keys** to access!



TSM Cyber SCIF

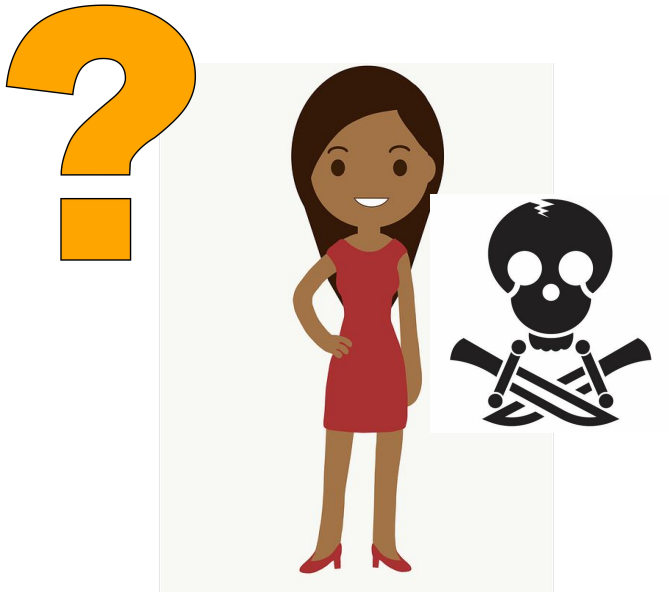
Residing in **separate Domains** if needed…

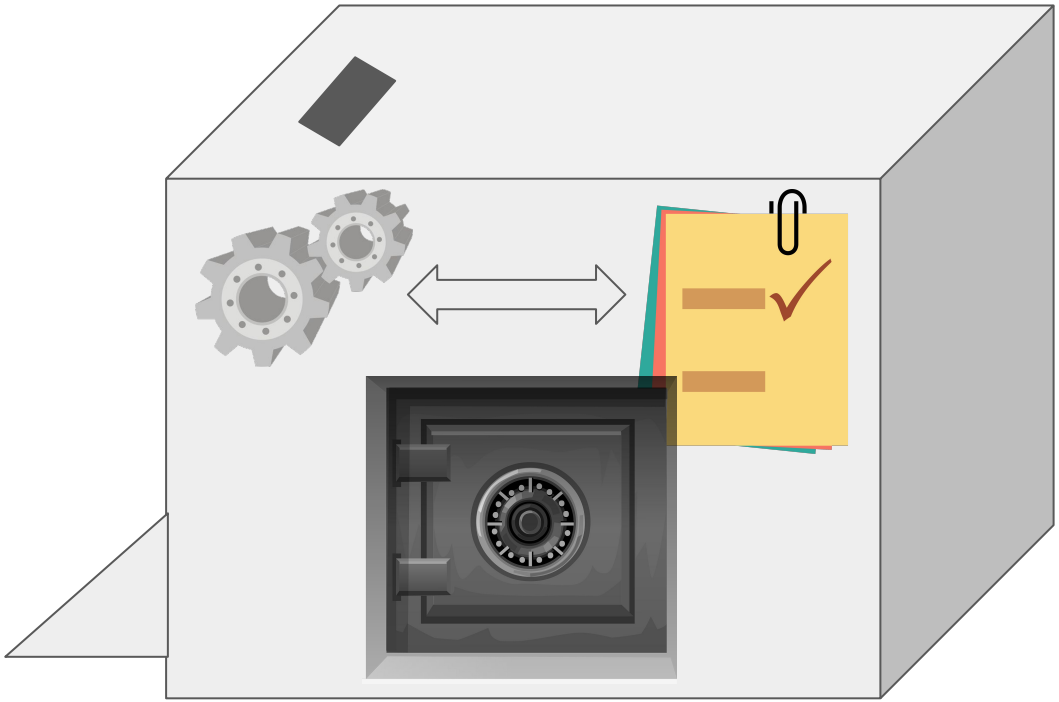




TSM Cyber SCIF

What about **Ransomware**?

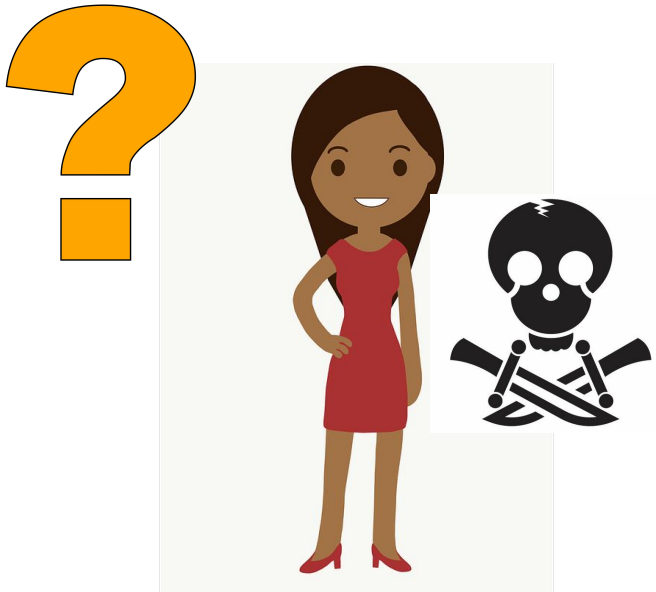


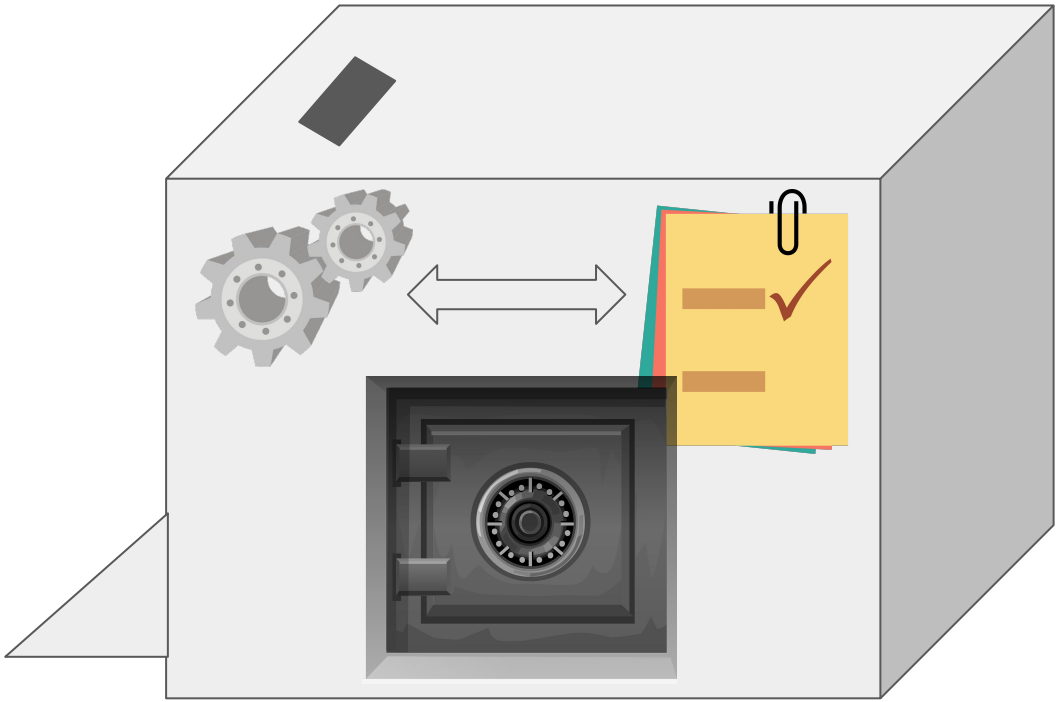


TSM Cyber SCIF

1. With the TSM Lockbox multi-domain option…

What about **Ransomware**?

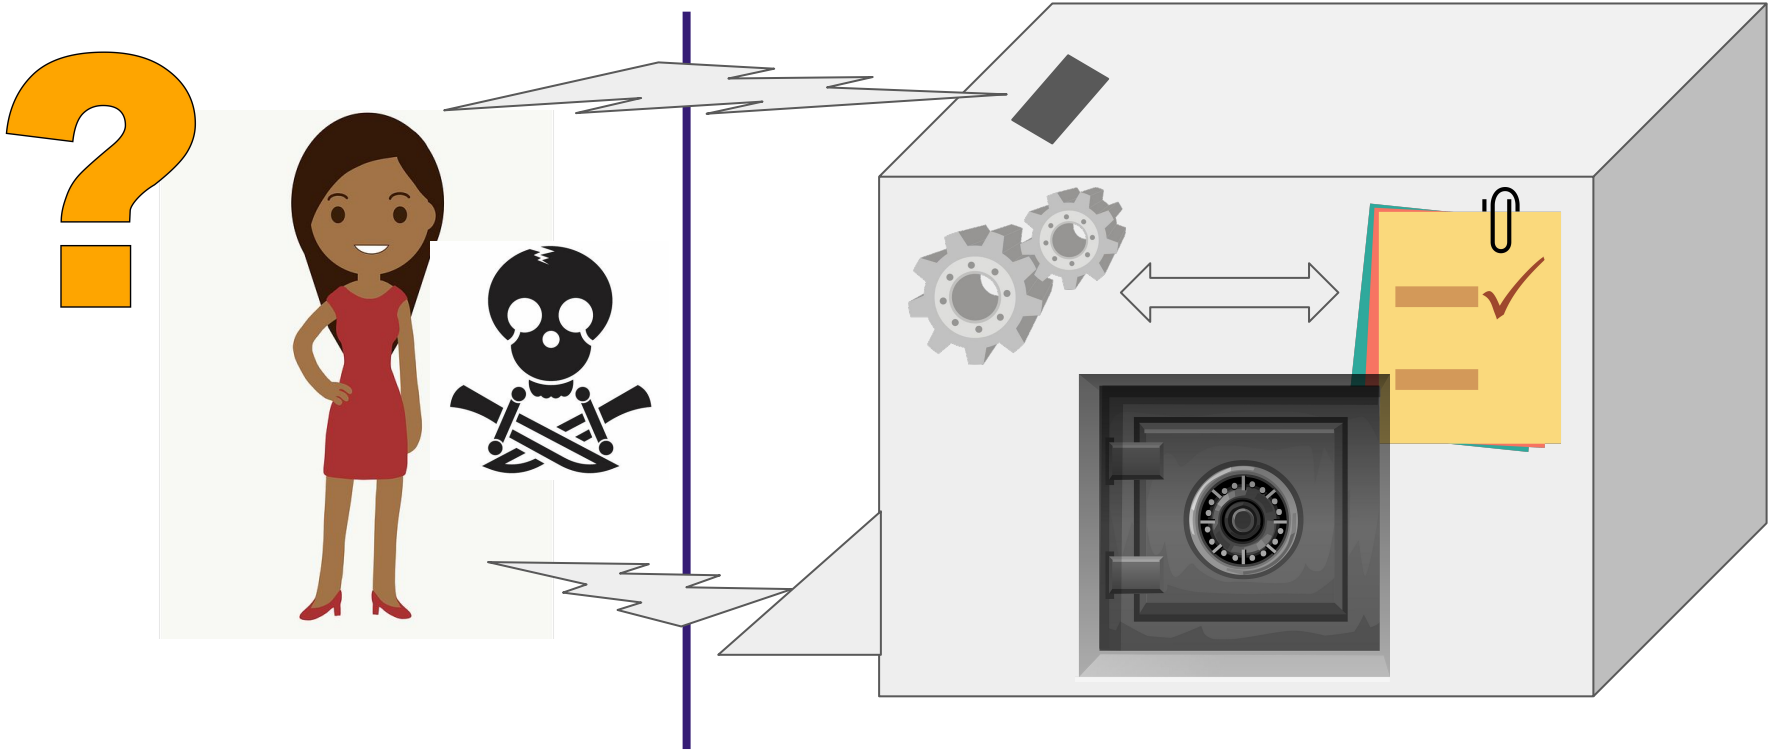




TSM Cyber SCIF

1. With the TSM Lockbox multi-domain option…
2. Requiring minimal access for safe inputs and outputs…

What about **Ransomware**?



TSM Cyber SCIF

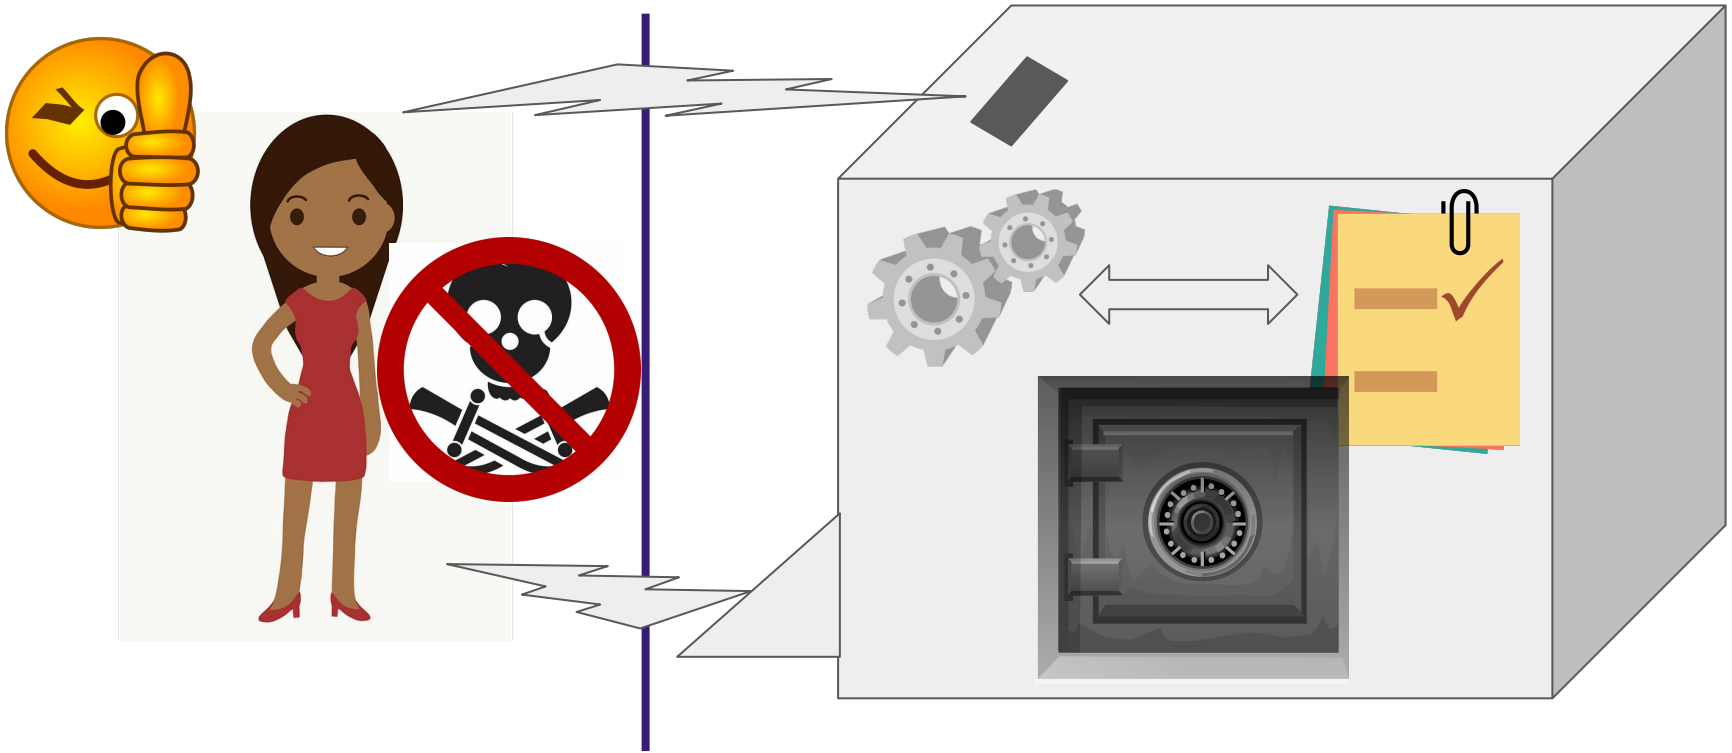
1. With the TSM Lockbox multi-domain option…
2. Requiring minimal access for safe inputs and outputs…
3. Important systems can be kept safe from Ransomware attacks

What about **Ransomware**?

TSM Cyber SCIF

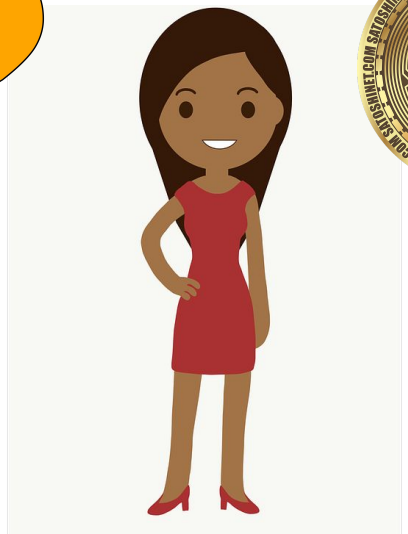
1. Due to the TSM Lockbox multi-domain option…
2. Requiring minimal access for safe inputs and outputs…
3. Important systems can be kept safe from Ransomware attacks
4. While also providing the backups to quickly get you back up and running

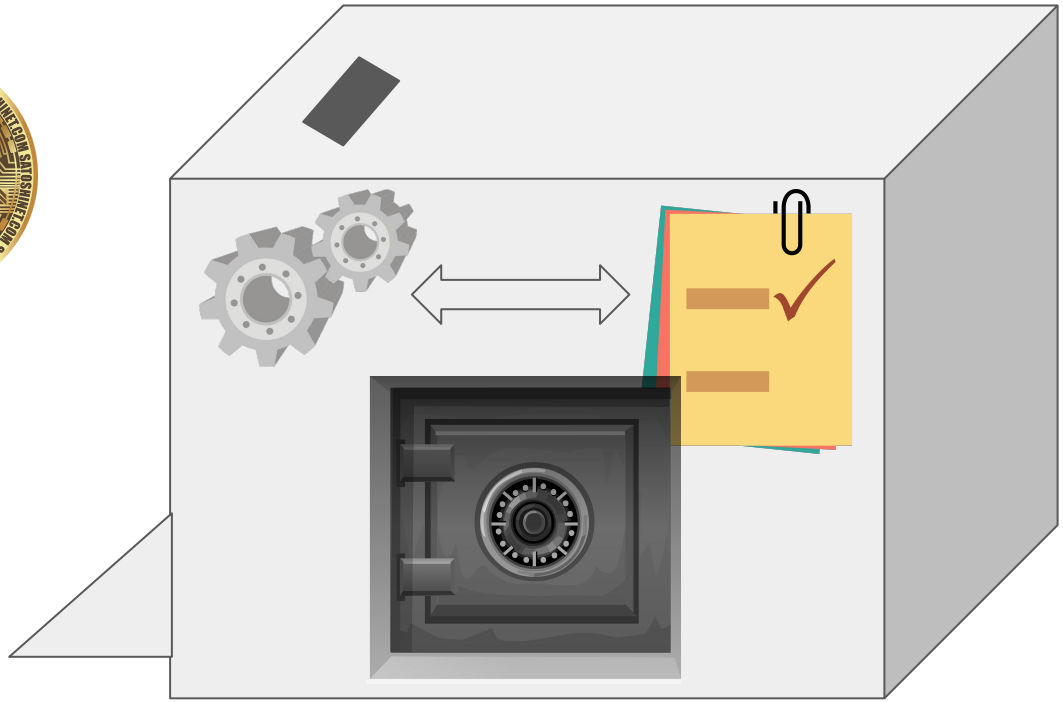
What about **Ransomware**?



TSM Cyber SCIF

What about **Crypto**?

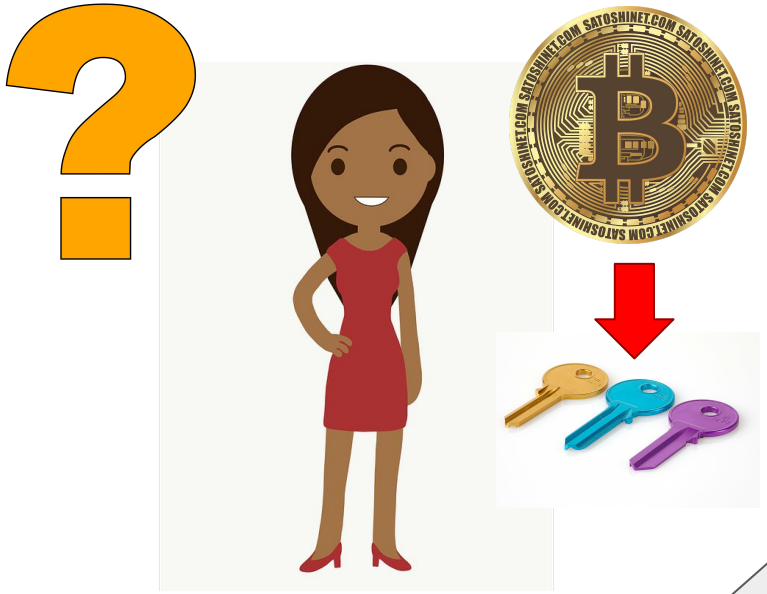


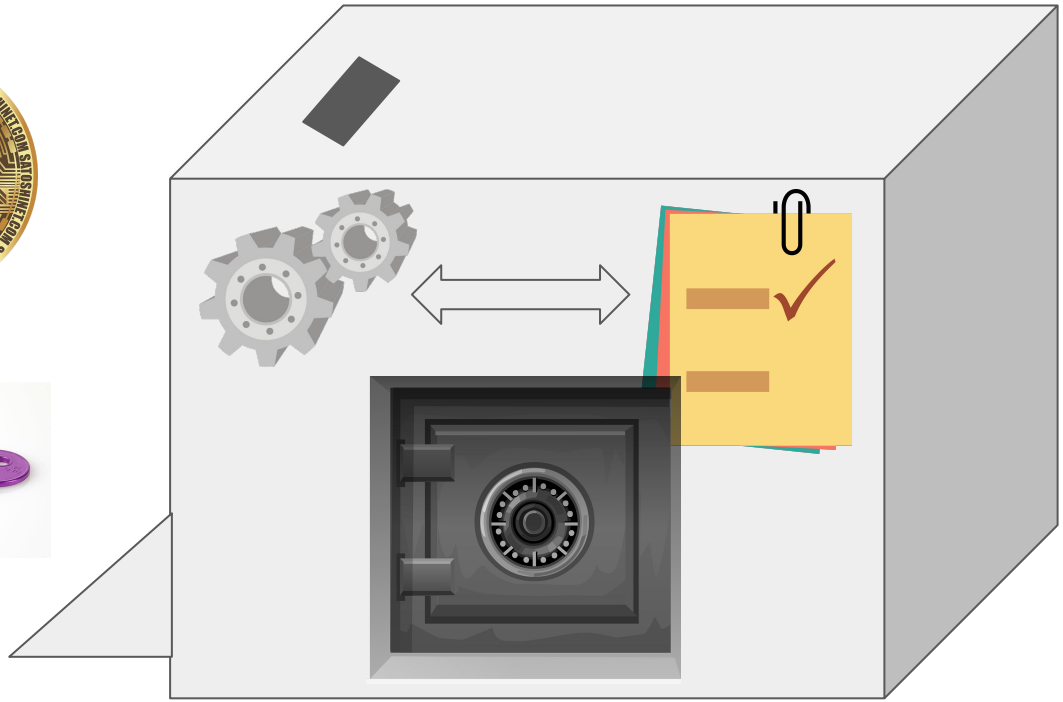


TSM Cyber SCIF

1. Most Crypto heists come from stealing the Crypto Keys

What about **Crypto**?

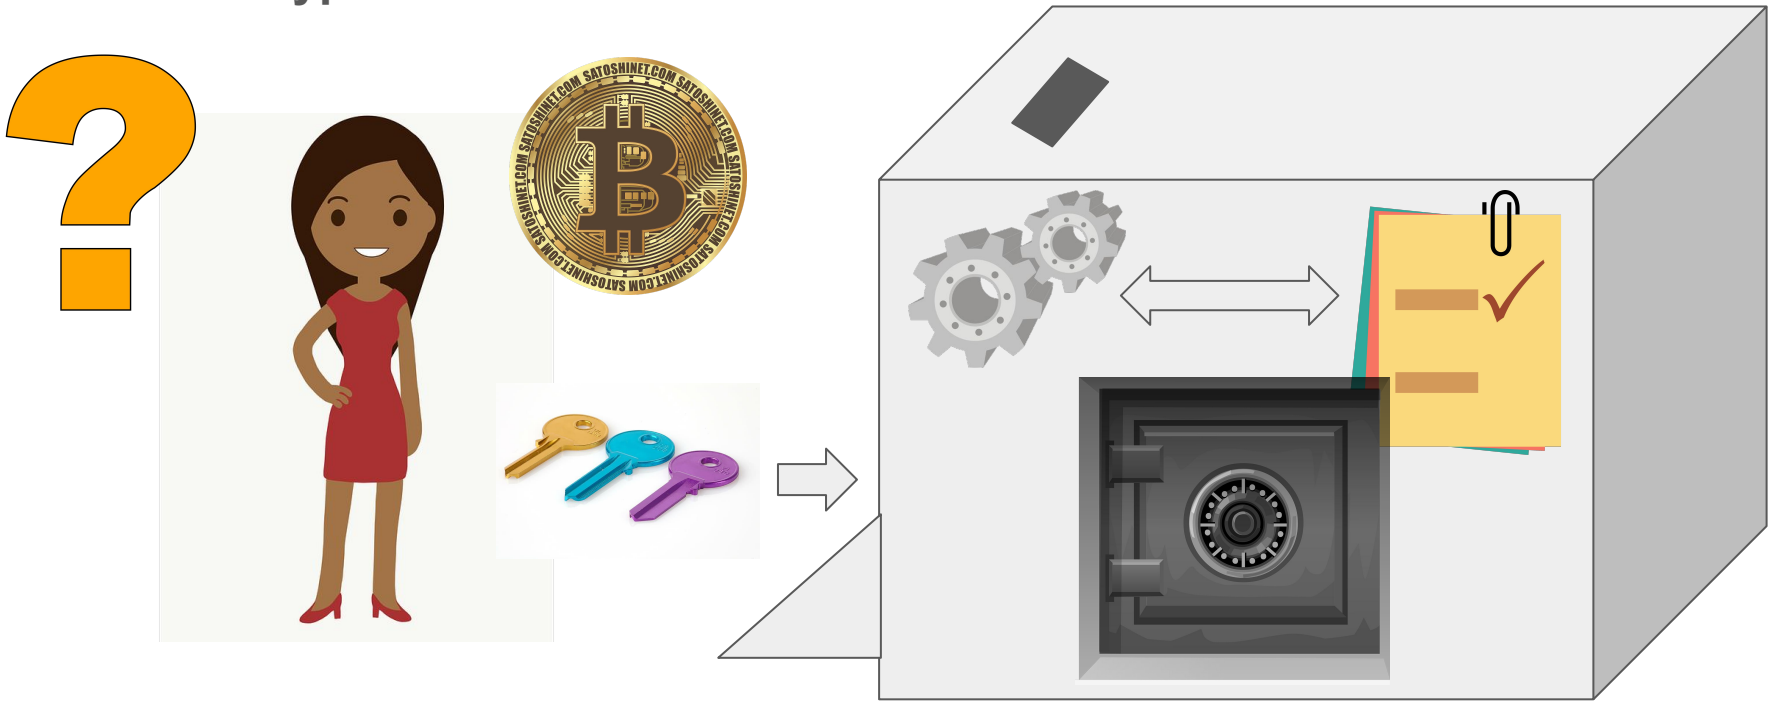




TSM Cyber SCIF

1. Most Crypto heists come from stealing the Crypto Keys
2. These keys can also be stored in a TSM Lockbox

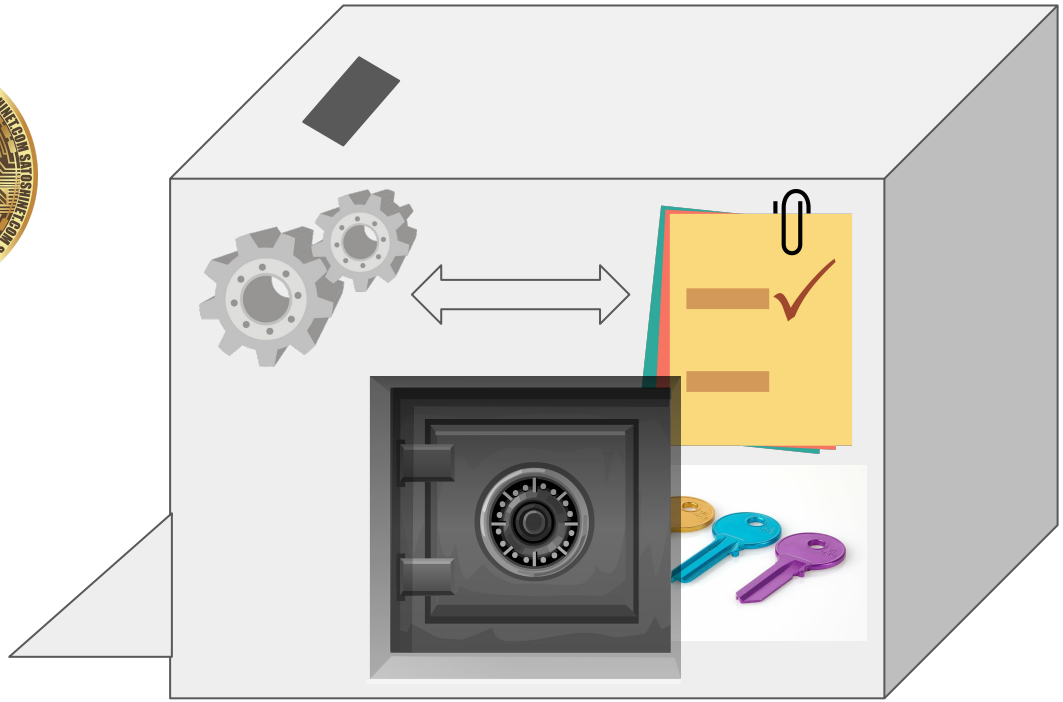
What about **Crypto**?



TSM Cyber SCIF

1. Most Crypto heists come from stealing the Crypto Keys
2. These keys can also be stored in a TSM Lockbox
3. Where they are safe from Ransomware

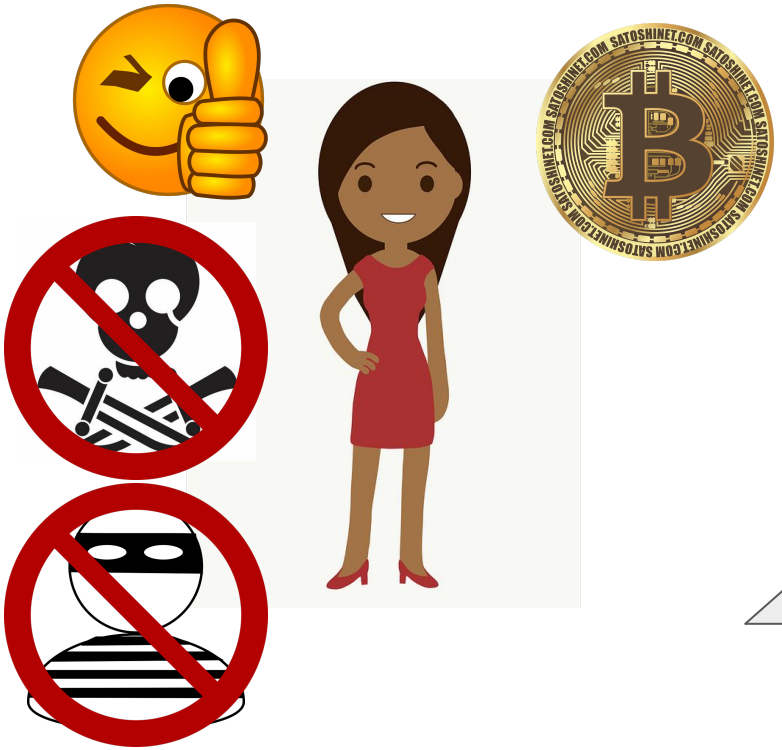
What about **Crypto**?

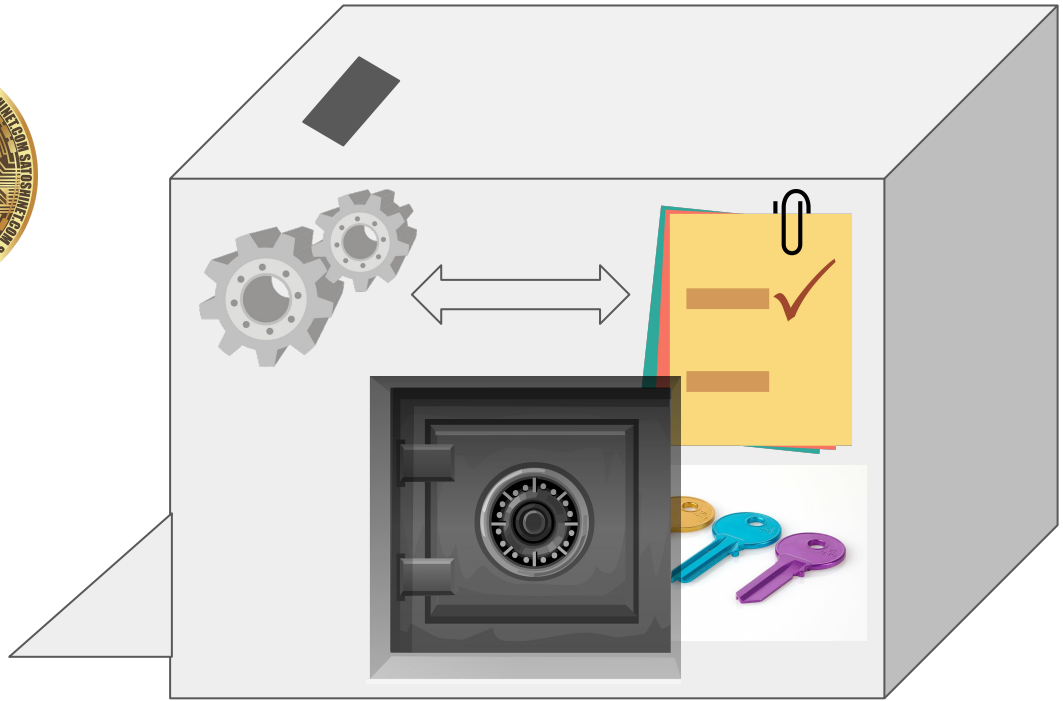


TSM Cyber SCIF

1. Most Crypto heists come from stealing the Crypto Keys
2. These keys can also be stored in a TSM Lockbox
3. Where they are safe from Ransomware
4. And heists

What about **Crypto**?

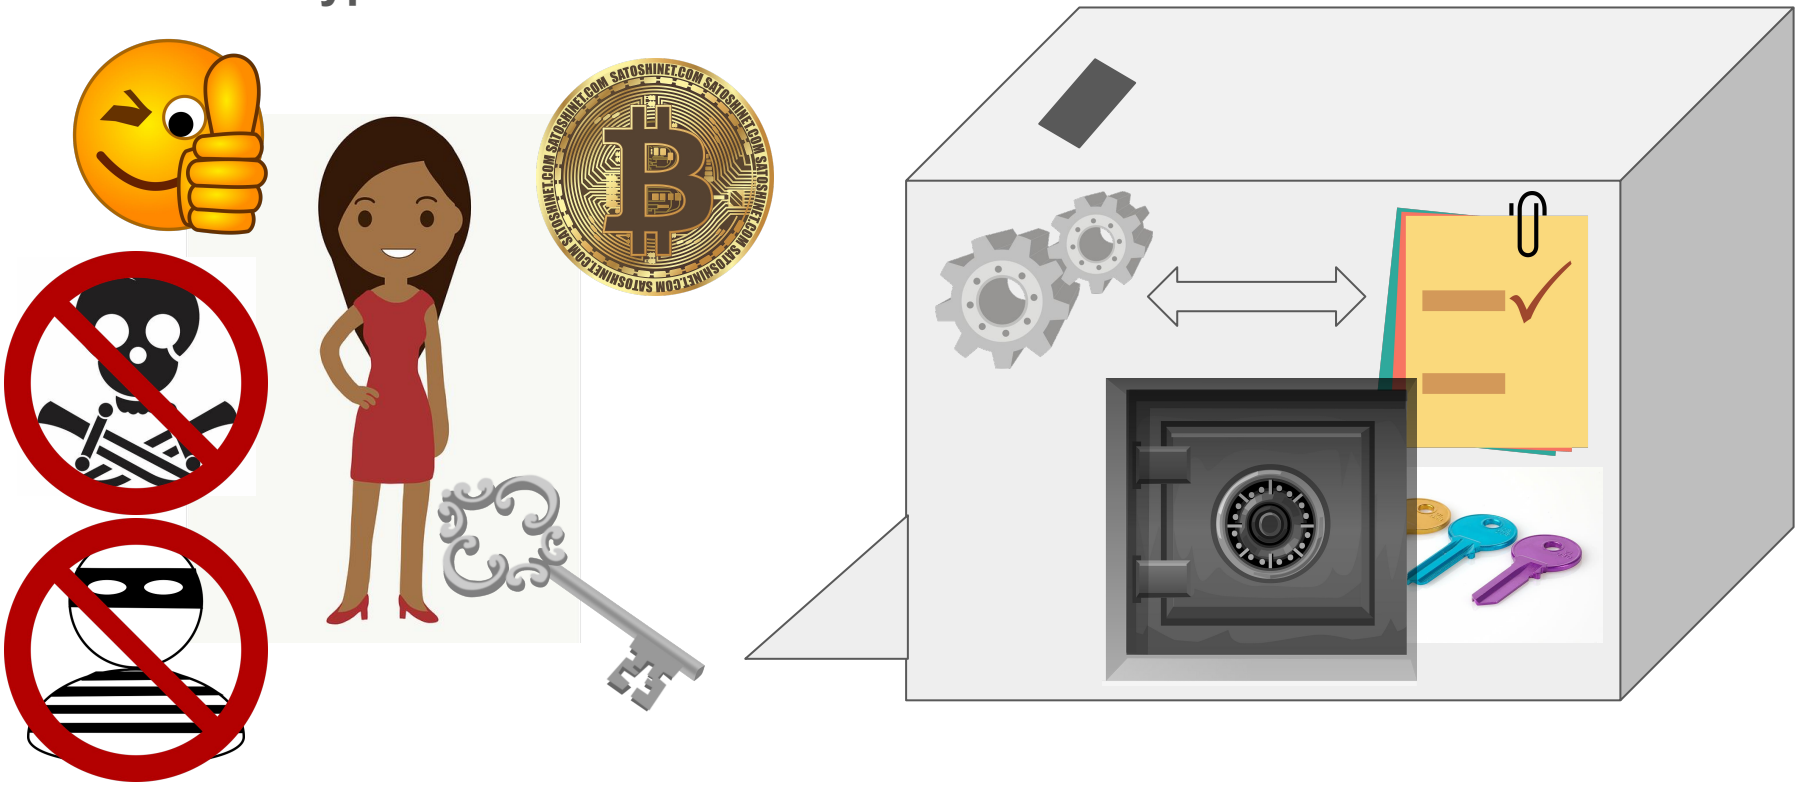




TSM Cyber SCIF

1. Most Crypto heists come from stealing the Crypto Keys
2. These keys can also be stored in a TSM Lockbox
3. Where they are safe from Ransomware
4. And heists - **because you hold the key!**

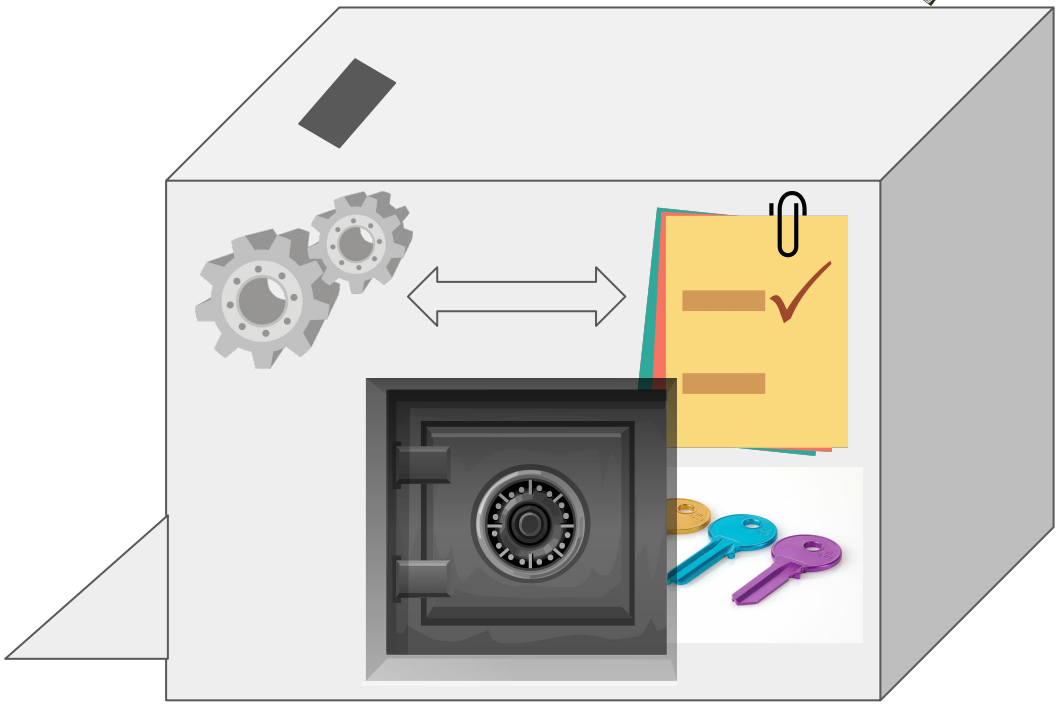
What about **Crypto**?



TSM Cyber SCIF

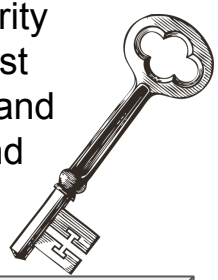
What about **Crypto**?

1. Most Crypto heists come from stealing the Crypto Keys
2. These keys can also be stored in a TSM Lockbox
3. Where they are safe from Ransomware
4. And heists - **because you hold the key!**
5. **And can require multi-domain keys for access!!**

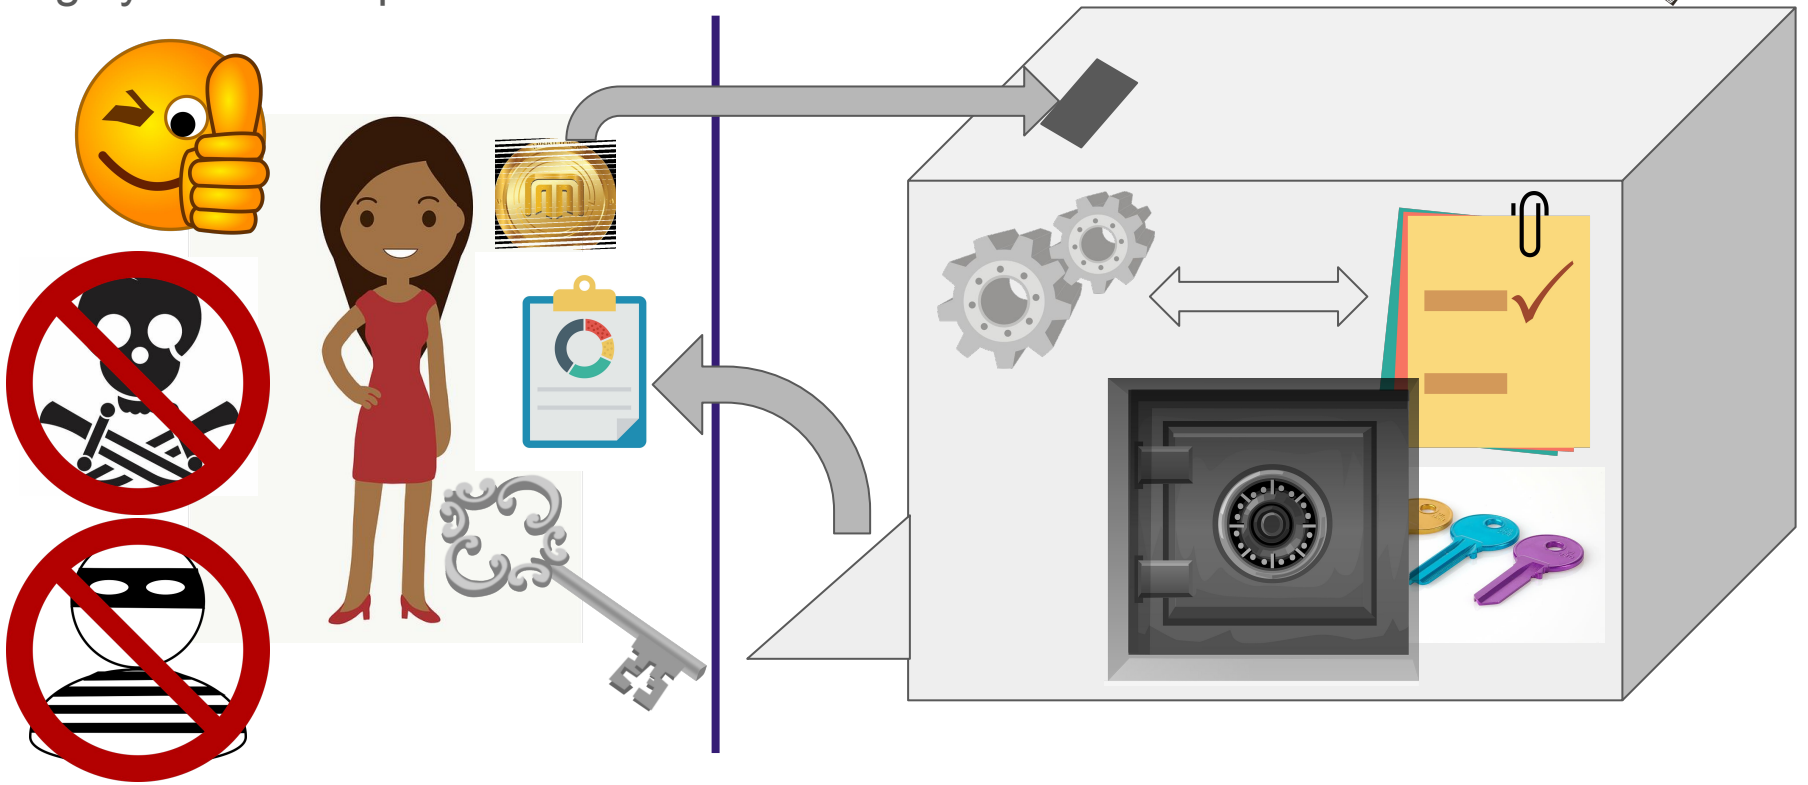


TSM Cyber SCIF

The TSM Cyber SCIF is a multi-domain, multi-key security system that locks sensitive information with the strongest available encryption and accepts safe token identifiers and applies AI infused processing to return non-sensitive and actional business output in a manner that prevents ransomware and data breaches.



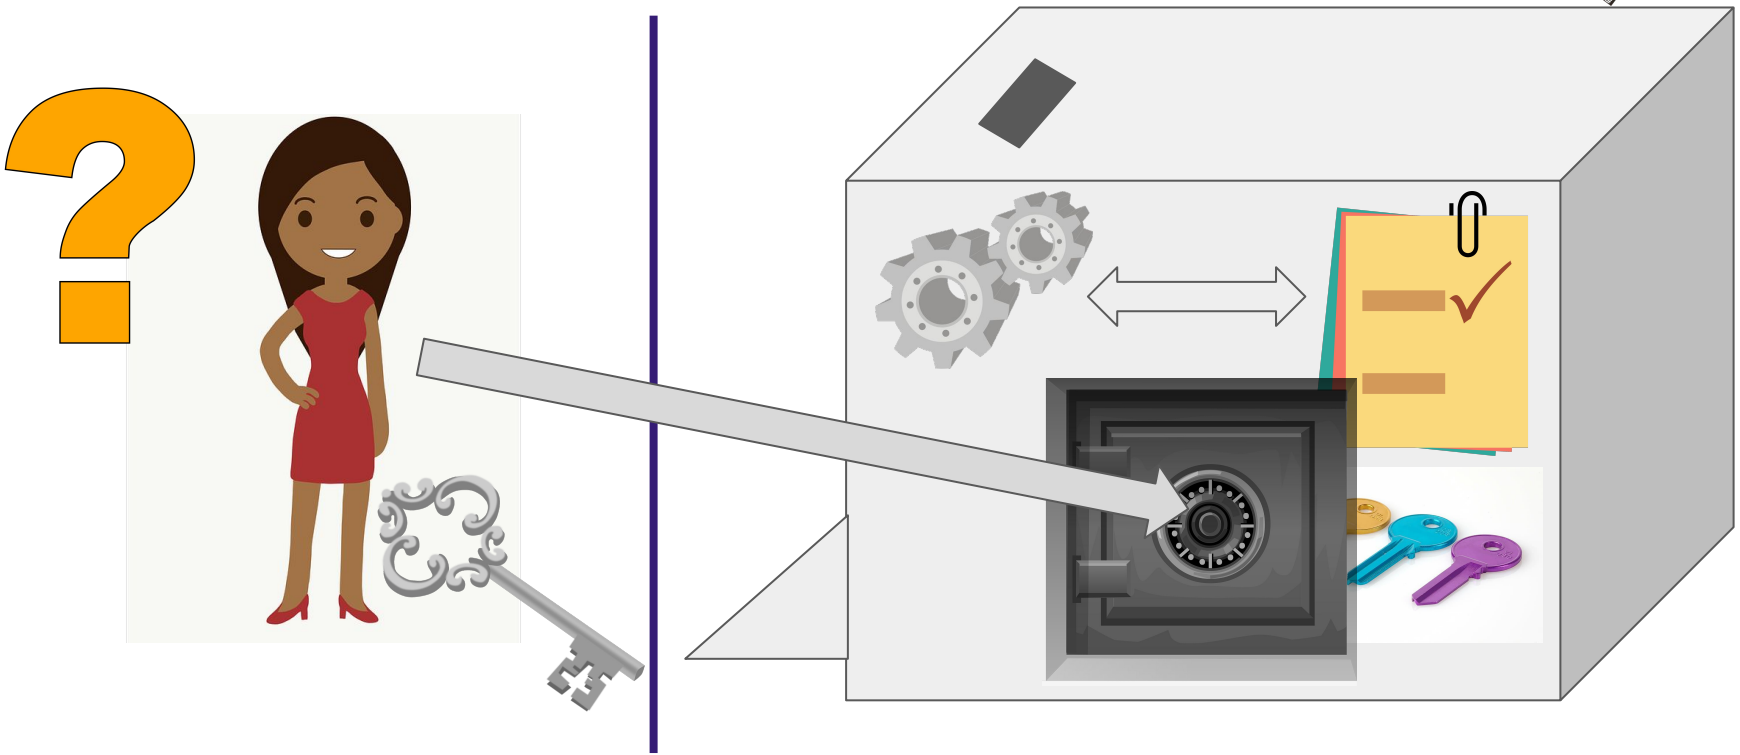
Highly advanced protection!



TSM Cyber SCIF

In process (and at rest), direct access to the TSM Cyber SCIF is locked and the sensitive data is not directly accessible.

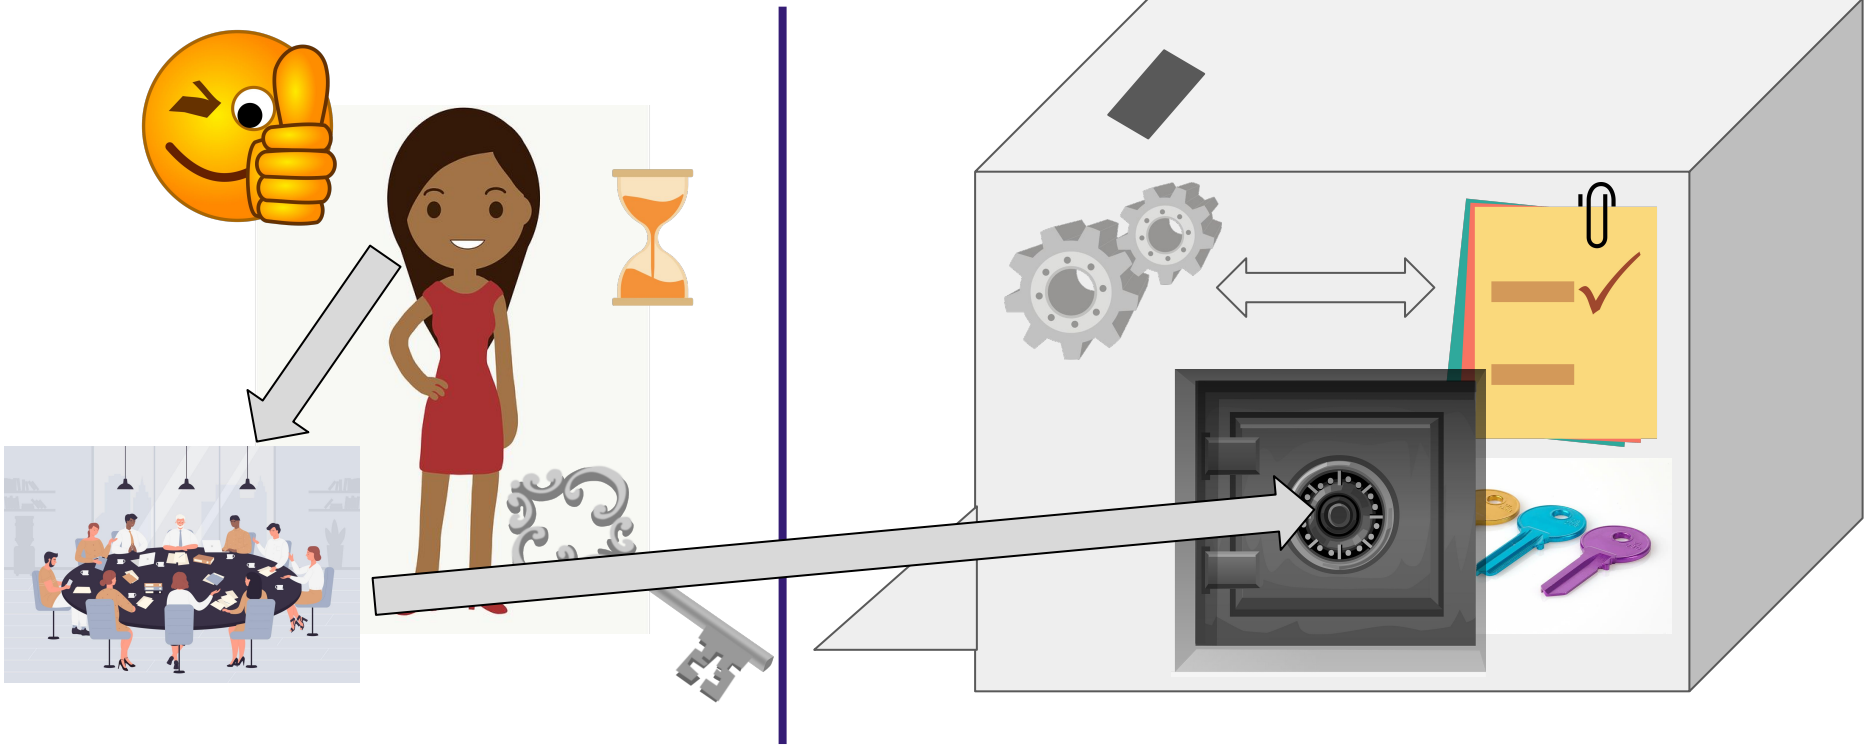
But what if we need to see ALL the data?



TSM Cyber SCIF

The TSM Cyber SCIF can be designed for committees to grant temporary and heavily monitored and logged direct access to sensitive data. Authorization processes can be fully governed and audited.

Multi-approval ITSM can be implemented!



TSM Cyber SCIF

The TSM Cyber SCIF can be designed for committees to grant temporary and heavily monitored and logged direct access to sensitive data. Authorization processes can be fully governed and audited.

- **And can accommodate changes to processing**

Multi-approval ITSM can be implemented!
