If You’re Worried About Communist Tyranny In America

By: Lou Sones

Look No Further Than Donald Trump

The cry from MAGA and the right wing is that someone like Angie Nixon from Florida, Mamdani from New York, and El Sayed from Michigan will turn us into a Communist country. Let’s really think about that.

What is it about the Communist countries that is so egregious, and what is everyone afraid of? It’s the dictators and oligarchs that run them.

They squash freedom of the press. Donald Trump

They have a Gestapo-like army, which kills its own citizens. Donald Trump

They use their power to enrich themselves. Donald Trump

They try to arrest anyone who disagrees with them. Donald Trump

They admire and do business with other despots. Donald Trump

They use cruelty and fear to maintain control. Donald Trump

They surround themselves with loyalists, competent or not. Donald Trump

They invade some countries and threaten to invade others. Donald Trump

They build monuments to glorify themselves. Donald Trump

They make execution a public spectacle. Donald Trump

They manipulate the economy and the free market. Donald Trump

They want to get rid of free and fair elections. Donald Trump

They gut the justice system so that they alone are above the law. Donald Trump Now let’s look at

Angie Nixon, Zohran Mamdani, and Abdul El-Said – So-called Democratic Socialists.

They simply believe that government should better the life of the people they represent. That health care, child care and good public education are available and affordable for everyone. That hard working people could buy a home. That there is not just the super-rich and the super poor. They want there to be a real middle class.

Are they going to be another Vladimir Putin, Kim Jong Il, or Xi Jinping? No. But Donald Trump is the one anybody who loves freedom and democracy should be afraid of. If you’re really afraid of a Communist Dictator, you should be terrified by Donald Trump and those that enable him – The Complicit Republican Cowards in Congress.
