- **5.** If you find someone violating waste management rules, please report to <EC emailID> with pictures.
- **6.** For clarification on waste management process, please contact office secretary.

Household waste distribution by volume

Did you know...? Nearly 95% of the household waste can be kept out of landfills if we practice the 3 R's and segregate waste at source.

The 3 R's

1. Reduce

Avoid buying single use disposables such as plastic/paper cups, gift wraps and packaged products. Many packages which are a combination of paper, foil and plastic are often difficult to recycle. Carry your own grocery bag every time you shop instead of accepting single use plastic carry bags. **Reducing the waste at source removes the need to manage it later!**

2. Reuse

Re-use old glass jars and plastic covers. You can give second life to your old clothes, books and electronic items by **repairing** them.

3. Recycle

Recycling is an energy intensive process. However, it is a better option than landfilling. Recycling helps **salvage raw materials** that would be lost forever if landfilled.

Colour-Coded Waste Segregation made Simple, Sustainable and Scalable. A public interest initiative supported by BBMP. This campaign started with a vision to manage 95% of our waste responsibly and to send only 5% to landfills. To join this campaign, write to 2bins1bag@gmail.com
