GAMESTOPTOKEN

GameStopToken.Com is a community first, open-source public service that uses blockchain technology to enable smart contracts and cryptocurrency trading without the involvement of a middleman. Our use cases are currently centered on entertainment, gaming, education, sectors with growth opportunities, strategically chosen, and other planned spaces to grow into. The Eco System works in Harmony with GSTM Use Cases, balanced with Gamers and Holders insuring a thriving united community. Our system gives back more (*Note), we did put in place a gas fee of 2.5 % that will be used for the slow burndown of tokens in starting year two, in year one 2.5% gas fee will be divided into Burns, Liquidity, and M&D. All three mentioned (Burns, Liquidity, M&D) are equally important (marketing is primary at first) as one cannot be without the other, our preplanned Burns & Burn Events were developed to balance our reward system, with time, data to analyze the systems will be deployed to help grow us into our market share correctly as planned for GSTM Eco System. Next on the list is to Ignite GSTM Eco Motor that also unites our community and as a collective, and we will achieve greatness together.

GSTM Multi Chain Token has externally owned accounts (managed by private keys, chartered by human users) and contract accounts available on BNB & Polygon. GSTM Multi Chain Token gives security and enables a wider range of decentralized actions for our community of holders. GameStopToken.Com has allowed for enough tokens to support all gamers, as we heavily market, start growing into our market share of gamers and holders, we will then start reallocating tokens or burning down the supply to accommodate for the correct market share. This will increase our token price in time so it will take fewer tokens instead of many tokens to play games or use services we provide to our end users, making a better all-around experience for the user. Our market cap will get affected during these transitions of growth and why we put in place, balancing by giving, burning or using both of these methods of during our growth should decrease the extreme volatility that normally would occur. Our Team is big and now will continue to grow as we campaign, campaign, and campaign our community centered Token!

GAMESTOPTOKEN.COM

GameStopToken.Com is dedicating itself to be one of the best meme tokens in the world, and why we created a powerful Decentralized Eco System using all the examples of crypto company's and memes that are existing today. Our goal is simple, and is to create a safe, useful, entertaining, harmonious, balanced, and beneficial environment for token holders and gamers.

Our unique Strategy combined with true common sense token economics is how we created GSTM Eco System. With our highly Experienced Team and Partners Rapid Innovations & Logic Simplified, and impressive combined work force North of Two Thousand Team Members who are helping us (GSTM Community) propel to reaches far beyond our users' expectations.

Creating anything new has its challenges and is why we started creating what you see prior to a single announcement or even a social media post, an example: We have in development a suite of P2E games, close to completion with plan to launch shortly after listing.

GameStopToken.Com comes to you with the full package, a plan with features that are ready to be deployed and used. We are not the group that likes seeing soon coming, setting a positive transparent and well communicated approach is our standard to uphold for our community of holders. We come to our community now with action, assets, a plan and ready to work hard to provide more than people could expect. In today's world you always need to be working on more!

Our main focus always Community! Priority after launching on P2B Exchanges Platform will begin a marketing campaign that has been set in place and waiting for our GSTM Token to List.

GAMESTOPTOKEN

Our token system is designed uniquely for multiple applications, different use cases for the gamers and holders who will join our community run token, they are the heartbeat of this token so this must be top priority. We have a suite of games for our P2E Gaming launching after our listing on P2B Exchange and those live games are primarily for the Start of Our Journey Together with GSTM Community of Holders. GSTM will announce a Giveaway to All Token Holders, GameStopToken.Com's "Big Bang Theory"! This is how GSTM Eco Motor will be ignited., "The Giveaway" rewarding holders is designed so there are no deflationary effects, this is a token giveaway to reward the community of holders supporting our GSTM Token. Our Team (GSTM) is setting an example of giving to "The Community", this is exactly what we want to show people and it's part of a great system. The reserve is set already for this Giveaway of 1b Tokens, and the length of giveaway depends on volume of holders. There will be a maximum number of tokens holders can capture each day and the volume will determine the time in weeks or months. To balance the giveaway and put the GSTM Eco Motor in motion we will Burn 2b tokens having a dual event over a determined period of weeks that will be announced in advance and begin after our listing on the P2B Exchange.

***Note the give away is 2.5% of the total supply going to our new community holders!**

As far as supply, we have allowed for enough tokens for a world of gamers and holders. This approach was done to grow into our market share correctly, after we go through our presale, then list our community GSTM Token onto P2B Exchange. We then will use these, as well our future phases of growth to gather data. This data collected will be used to determine the number of tokens needed for our future Burn Events, and Rewards System for community growth and continue to dive deeper into our market share, with no limits set for GSTM Community.

During all phases of our growth there will be burning, giveaways, an automated burn system in place for gradual burning, these different systems will allow us to grow balanced with our community of holders/users and the correct amount of tokens needed in circulation.

GAMESTOPTOKEN

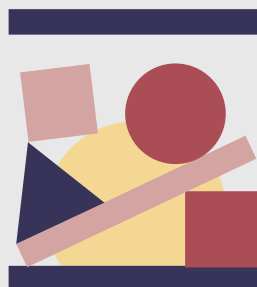

GSTM Gaming Arena is being created to host gaming events, this will be no ordinary arena, built for pro style entertainment purposes, this will bring more excitement and something new for Gamers and Viewers. The Arena is also a center point for future growth, GSTM Arena is under development, updates will be well communicated as we continue to get closer to opening day.

P2E Gaming GSTM is developing will be matched up to the best games in this space, these complex games are amazing as well fun to develop, and excited to shock you with our new to market games. This will take time, it's a ongoing job creating these games, adding onto and maintaining such a portfolio is never ending, GSTM is ready and working on this now. We are open in the future for something more than just to showcase our own games, adding to use cases and networking with blockchain opportunities.

GameOn Studio will be state of the art and is being designed for game lovers, development enthusiasts, anyone who may want to make a few games to share with family and friends. Others may want to take their creativity to the next level, and launch their own game, many possible applications for GSTM users with our GameOn Studio.

GameGo will be hosting a suite of educational games, and this is a utility that is needed around the world, a way of sharing knowledge in a fun and entertaining way. Our primary goal will be helping educate people of all ages offering a variety of genres life has challenged us with. The possibilities are endless just with GameGo itself...

All these things we are doing, all things under GameStopToken umbrella now and what will come is what will make our token great, you the community of holders are our #1 priority and will make this journey together amazing for everyone!

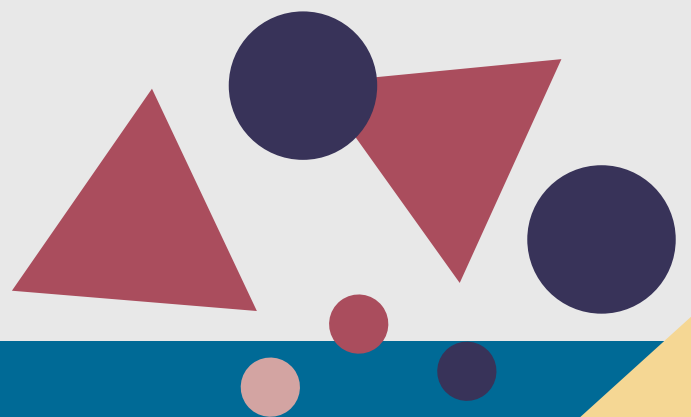

GAMESTOPTOKEN

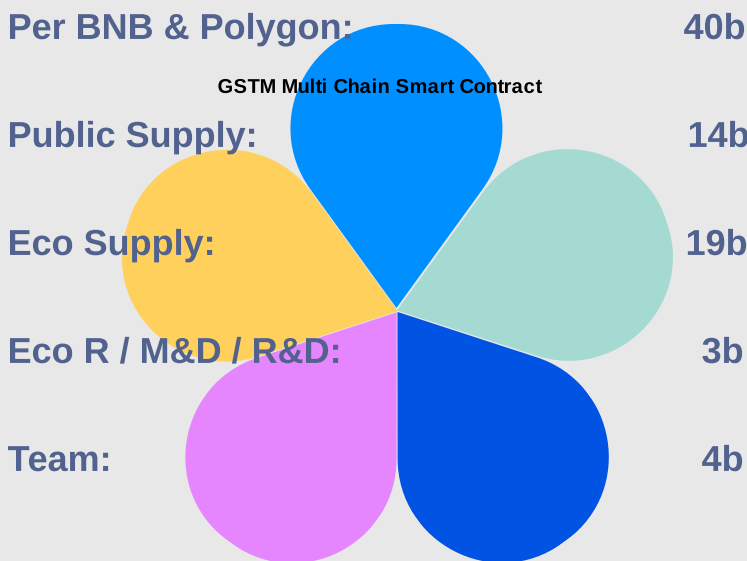

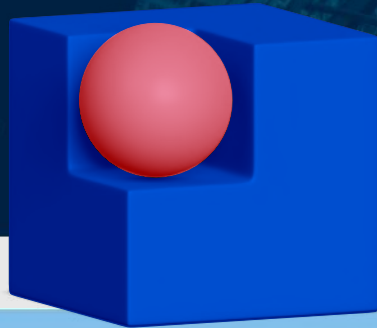

MemeCom Studio is being designed for serious meme token creators so they can design, get started in crypto and launch into blockchain technology. This is also created for designers to help with creative graphic designs and launch a successful marketing campaign for their clients. Meme creators and promoters need a great place to create their own unique designs and have the competitive edge needed in today's fast paced world.

We are excited and proud to help other Meme's and not create a competition out of our meme platform, we love memes and admire so many that we want to unite memes not divide them. We plan to Host Meme Festival's in different regions of the world. This will be a fun yearly event that can be held in several places with different event dates, some more fun things to look forward to. We feel the creators, token holders, and all meme fans would love to celebrate their piece of freedom. A place to network face to face with all the great and new memes would be fantastic.

GameStopToken.Com has a merchandising agreement in place, products are being sold to the general public, supporters helping to brand our name so we can take our place as a strong decentralized community token. Our hoodies, t-shirts, hats, mugs, tumblers are already selling, and we are proud to show GSTM community our aggressive approach. We have made a series of future (draft) designs, soon to launch another line of hats, shirts, and hoodies. We have covered a lot of ground and look forward to many new items in the merchandizing space.

GAMESTOP TOKEN

GAMESTOPTOKEN KEY USE CASE TAKEAWAYS

GameStopToken.Com is more than a gaming platform, it's a complete entertainment token eco center created for gamers and token holders. Our unique approach of intertwining entertainment, gaming, and educational use cases. Use cases include and are limited to:

- Gaming Arena
- P2E Gaming
- GameOn Studio
- MemeCom Studio
- GameGo, Educational Gaming
- Merchandizing
- Asset Investments
- MemeCom Festivals

GSTM goal is to create an environment where gamers and token holders are secured by a diversified system of use cases. Aligned with allocated reserves while accompanied with an investment approach for long term growth.

Our unique Eco Motor, solid design, technical partnerships, the viral and inevitable growth of blockchain will reinforce GameStopToken.Com's community of holders, springing us to new heights.

GAMESTOPTOKEN HARD ASSET USE CASES GROW AND STABILIZE GSTM FUTURE ASSEST INVESTMENTS

There is no way to optimize liquidity flow, use case complexity, end user rhythm, then create structure, and depth with finance without planning ahead with a team of professionals. As most know the largest companies are always on the lookout for safe investments to diversify in order to truly grow a community long term.

GameStopToken has a plan in place now for the purchasing of Commercial Multifamily Properties, we feel there are always opportunity's but now this CRE Market will see a switch from seller to buyers market. So we are entering a good time and timing is key, these types of investments bring in a consistent revenue (ROI) that can be reinvested into more property assets, and growing our family.

Another great investment is raw land, then apply (develop) with green energy conversions to supply energy companies needed power. This is a key long term investment, our future energy demand load is beyond current capacity so we will seize this opportunity. In turn GameStopToken would convert profits from these assets to acquire more investments and continue the cycle, creating residual income for our long term survival.

All this would be part of GameStopToken.Com , all under one umbrella equals more liquidity, boosting our market cap. We believe Real Estate and Energy Sectors are two great and safe community portfolio investments that if owned outright can slowly grow GSTM profits into its own monopoly division for GameStopToken and our Community will reap the benefits.
