

# CAPABILITY STATEMENT

## WATER – SOIL – CONCRETE - ASPHALT

Data Testing is your local expert for comprehensive geotechnical, environmental, and wastewater investigations and testing. As a small, community-driven firm, we go beyond just services – we build collaborative partnerships. We understand the unique needs and challenges of our clients in Western Arkansas & Eastern Oklahoma. With in-house drilling capability and laboratories (water, soil, & construction materials), we are a one-stop location to support all of your investigative needs. Additionally, we often partner closely with our co-located sister company, Mickle Griffin Engineers & Surveyors, to provide broader solutions for site design, surveying, foundation recommendations, and construction administration tailored to your project's success.

## CORE SERVICES

- Geotechnical Investigations & Engineering
- Environmental Soils Investigations
- Wastewater Environmental Laboratory Testing
- Construction Materials Testing – Field & Lab

## OTHER SERVICES PROVIDED

- Special Inspections
- Construction Materials Quality Control
- Regulatory Compliance Assistance

## WHAT SETS US APART?

- **Responsiveness:** We prioritize fast, clear communication and are readily available to address your questions and concerns. You won't get lost in the shuffle of a large firm.
- **Local Expertise:** We boast deep knowledge of your local landscape, regulations, and permitting processes. Our team lives and works here, understanding the intricate details that can make or break your project.
- **Strong Local Network:** We've built relationships with key stakeholders, contractors, and subcontractors, leveraging valuable local connections to expedite your project and ensure smooth execution.
- **Personalized Attention:** Dedicated technicians and engineers assigned to your project, ensuring continuity and understanding.
