1. Introduction

The EHS Program aims to ensure a safe and healthy work environment for all participants involved in the study.

2. Injury and Illness Prevention Program (IIPP)

- **Objective:** To prevent workplace injuries and illnesses.
- **Responsibility:** Designated Safety Officer
- **Training:** Mandatory safety training for all participants.
- **Hazard Assessment:** Regular inspections and risk assessments.
- **Documentation:** Incident reports and corrective action logs.

3. Code of Safe Practices

- **Objective:** To establish a set of safety rules and guidelines.
- **Scope:** Applicable to all tasks and operations.
- **Key Practices:**
 - Confined Space Entry
 - Lockout/Tagout
 - Fall Protection

4. Hazard Communication

- **Objective:** To ensure all hazardous materials are properly labeled and handled.
- **Material Safety Data Sheets (MSDS):** Available for all hazardous materials.
- **Training:** Chemical safety and proper disposal methods.

5. Additional Policies and Guidelines

- **Confined Space Entry:** Procedures for safe entry and exit.
- **Lockout/Tagout:** Guidelines for de-energizing electrical and mechanical systems.
- **Fall Protection:** Use of harnesses and other safety equipment.

6. Research Objectives (Section 1.6)

- **Objective:** To measure and quantify NEIs and assess their impact on HCS.
- **Data Collection:** Surveys, interviews, and environmental sampling.
- **Data Analysis:** Statistical methods to update data inputs within the existing NEI calculation tool.

This EHS Program is designed to be in compliance with industry standards and regulations. It is essential for all participants to adhere to these guidelines to ensure a safe and productive work environment.
