

ORGANIZE YOURSELVES **PREPARE** EVERY NEEDFUL THING

DOCTRINE & COVENANTS 88:119

Two weeks of water

1 gallon person/day

for 14 days is the **minimum** recommended amount of water to store for drinking and light sanitation in case of an emergency

Water Basics:

- Start with a 3-day supply & gradually add until you have a 14-day supply.
- Think of the best way of storing water for your family.
 - **Barrels**- available in a range of sizes great for stationary storage (a 55-gallon will provide for a family of 4 for 14 days)
 - **Boxed Water Kits**- good for small spaces & portable
 - **Small Water Boxes/Pouches**- excellent and quick access to water storage while being portable.

Water Treatment:

- Three Ways
 - Extreme Heat (boiling or distilling)
 - Disinfectant (purification or chemical)
 - Light (ultraviolet)
- Don't forget to have a good filter available to help remove protozoa and bacteria, plus (depending on the filter) odors, particles, and unpleasant flavors.
