

Seeking a Technical Co-Founder

Help Us Revolutionize Industrial Logistics with AI & Automation

About 1klx

1klx is an **AI-driven SaaS platform** transforming **industrial project logistics** for EPCs, freight forwarders, and global supply chain leaders. We eliminate inefficiencies, enhance visibility, and optimize multimodal logistics with AI-powered solutions. Our platform replaces spreadsheets and emails with real-time analytics, automation, and predictive intelligence, setting a new industry standard.

The Opportunity

We are seeking a **Technical Co-Founder (CTO)** with a strong background in **back-end engineering, AI automation, and cloud infrastructure** to join us at this critical growth stage. As a co-founder, you will play a pivotal role in **shaping the technology, architecture, and future strategy of 1klx**.

Key Responsibilities

- Develop and scale a robust, cloud-based logistics SaaS platform
- Integrate AI-powered analytics and predictive modeling for logistics optimization
- Design secure and scalable APIs for seamless multimodal logistics coordination
- Optimize system performance, reliability, and data security
- Lead engineering decisions and build a world-class tech team
- Work closely with the CEO to drive product-market fit and strategic direction

What We Offer

- Co-founder status with significant equity in a high-growth SaaS startup
- Direct influence on an industry ripe for disruption
- Opportunity to build cutting-edge AI and automation-driven logistics solutions
- Access to an extensive network of industry leaders and investors

Ideal Candidate Profile

- Expertise in back-end development (Python, Node.js, Java, or similar)
- Strong experience with cloud platforms (AWS, GCP, or Azure)
- Background in AI/ML, predictive analytics, and automation
- Experience in scalable SaaS architecture and API integrations
- Familiarity with ERP, IoT, or logistics technology is a plus
- Entrepreneurial mindset with a passion for solving complex logistics challenges

Next Steps

If you are passionate about building next-generation AI-powered logistics solutions and are ready to co-lead a disruptive SaaS startup, let's connect.
