

R1 Classic Tabletop Radio

- DAB/DAB+/FM Tuners
- Built in Bluetooth for music playback from a compatible device
- USB socket on the rear of the unit allows for the charging of a smartphone
- Alarm functions
- OLED display with adjustable brightness
- Time/Date automatically updates from DAB signal*
- Available in Rich Walnut, Soft White and Soft Black
- Winner of Which? best buy and What Hi-Fi 5 stars
- Ruark Audio awarded best and most reliable radio brand by Which? magazine 2016

Hotel Software for the R1 MK3 is available upon request. Installing Hotel Software on the R1 will limit the maximum volume to a level so not to disturb other guests and reduce the alarm function to 'once only'.

“The Ruark R1 bluetooth radios are an excellent addition to our exclusive hotel rooms. The walnut colour matches the wood in the rooms, the sound quality is excellent and it is great you can control the set with your own device”

Stephen Nash
Director of Operations – Marriott Park Lane, London

* When power to the room has been disabled as a result of any environmental policy or simply down to power failure within the hotel, the Ruark Audio R1MK3 will pluck and retain all time, date and alarm settings as soon as the power to the room resumes. The same principle applies for day light savings (DST). Here the R1MK3 will adjust the time automatically in line with DST.
