AVE VALLEY *Springwater*

AVE VALLEY water is tapped in Tetra Pak 100 % recyclable 83% plant based materials.
Most water is tapped in plastic bottles, recycled or not; plastic is plastic and not healthy for you -OR our environment!

6 LAYERS OF PROTECTION

Tetra Pak water packages are made with 6 layers of protection to help secure the water against air and light, keeping it safe and fresh requiring no preservatives. The main material in all our packages is paperboard. We use just enough to make the package stable, without adding unnecessary weight. Paperboard is a renewable material, made from wood grown in sustainable forests.

Polyethylene
Isolates humidity and liquids to protect the pack's content

Cardboard
The primary component in the pack, from renewable resources
New trees are planted to replace the ones used for production

Aluminum
Very thin layer to protect water from external factors like sunlight and air
Maintains the validity of the food inside for long time without the need for cooling

All Natural

Optimal pH Balance

Rich in Minerals

Alkaline

Superior Hydration

Exceptional Purity

Great Taste

Premium Sustainable Packaging

Versatile Applications

Pure Nature
